Using Asset-Based Teaching for Grades 6-12 Michael D. Steele,Joleigh Honey,2024-07-30 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset based teaching An asset based perspective

on math education means starting with what students already know instead of focusing on what's missing. This approach elevates student thinking and reasoning skills. In this way, educators acknowledge that all students bring prior experiences, strengths, talents, and resources to the learning process and can contribute meaningfully in an authentic learning environment. *Transform Your Math Class Using Asset Based Teaching for Grades 6-12* provides insight into asset-based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book, Michael Steele and Joleigh Honey highlight the importance of using language, instructional routines, and systemic structure that positively impact student engagement, their math identity, and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive, and empowering learning environments, this book introduces an asset-based perspective that focuses on students' strengths, assets, and potential to learn mathematics. Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset-based perspectives. Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math, and promoting equitable math instruction. Supports teachers in reflecting on their decisions, self-awareness, and self-management. Includes a companion online study guide to support teachers individually or as part of a professional learning community. Adopting asset-based perspectives is about movement over time, not about flipping a switch. This book paves the path for an asset-based journey that ultimately helps to transform our math classrooms and advance all students' learning and development.

Restoring the Educational Dream. Rethinking Educational Transformation in Zimbabwe Shizha, Edward, 2013-12-07. The role of education in human well-being and social development cannot be overestimated. After a number of highly commendable policies on education in the first decade of independence, the education system in Zimbabwe has taken a tumble that needs both examining and rectifying. This volume analyses the challenges facing the education system in Zimbabwe and explores and scrutinises theoretical and practical possibilities for restoring the educational dream that was initiated at independence in 1980. The book is targeted at academics, scholars, college and university students, policy makers, and other stakeholders and advocates a multi-pronged approach that must involve all stakeholders if educational retransformation, reconstruction, and restoration are to be achieved. The authors provide a range of recommendations for a project that would restore the educational dream in Zimbabwe.
