Technical Analysis of Gaps Julie R. Dahlquist, Richard J. Bauer, 2012 Gaps have attracted the attention of market technicians from the earliest days of charting. They are not merely conspicuous; they represent price jumps that could signal profitable trading opportunities. Until now, however, folklore about gap trading has been common and tested research-based knowledge virtually nonexistent. In *Technical Analysis of Gaps*, renowned technical analysis researchers Julie Dahlquist and Richard Bauer change all that. Drawing on 60 years of comprehensive data, they demonstrate how to sort strategic gaps from trivial ones and successfully trade on gaps identified as significant. Building on work that recently earned them the Market Technicians Association's 2011 Charles H. Dow Award for creativity and innovation in technical analysis, Dahlquist and Bauer offer specific gap-related trading tips for stocks, futures, and options. They consider a wide variety of market conditions, including gap size, volume, and previous price movement, illuminating their findings with easy-to-understand diagrams. Coverage includes understanding what gaps are and how they arise, recognizing windows on candlestick charts, identifying gaps with superior profit potential, combining gaps with other technical techniques for a more complete and effective analysis, and putting it all together with real trading strategies. For stock, commodity, and currency traders in the U.S. and worldwide and for active individual investors seeking new ways to maximize returns.
