Topographic Memory and Victorian Travellers in the Dolomite Mountains William Bainbridge, 2025-10-01 Guided by the romantic compass of Turner Byron and Ruskin Victorian travellers to the Dolomites sketched in the mountainous backdrop of Venice a cultural Petit Tour of global significance As they zigzagged across a debatable land between Italy and Austria Victorians discovered a unique geography characterized by untrodden peaks and unfrequented valleys The discovery of this landscape blended aesthetic scientific and cultural values utterly different from those engendered by the bombastic conquests of the Western Alps achieved during the Golden Age of Mountaineering Filtered through memories of the Venetian Grand Tour the Victorian encounter with the Dolomites is revealed through a series of distinct cultural practices that paradigmatically define a Silver Age of Mountaineering This book shows how these practices are more ethnographic than imperialistic more feminine than masculine more artistic than sportive rather than racing to summits the Silver Age is about rambling rather than conquering peaks it is about sketching them in an intimate interaction with the Dolomite landscape

The Arabian Seas: Biodiversity, Environmental Challenges and Conservation Measures Laith A. Jawad, 2021-03-30 The Arabian Seas Marine Region encompasses marine areas from Djibouti to Pakistan including the northern part of Somalia the Red Sea the Arabian Persian Gulf and parts of the

Arabian Sea Human pressures on the coastal and marine environments are evident throughout the region and have resulted in harmful environmental effects Oil and domestic urban and industrial pollutants in several areas of this part of the world have caused local habitat degradation eutrophication and algal blooms Further coastal landfill dredging and sedimentation as well as nutrient and sediment runoff from phosphate mining agriculture and grazing and reduction in freshwater seepage due to groundwater extraction are all contributing to the degradation of coastal environments This book discusses aspects not covered in other books on the region which largely focus on marine biodiversity and examines several environmental challenges that are often ignored but which have a significant impact on the environment Evaluating the status quo it also recommends conservation measures and examines the abiotic factors that play a major main role in the environmental changes Lastly the book addresses the biodiversity of the area providing a general context for the conservation and management measures discussed
