Ghost Cities of China Wade Shepard, 2015-04-09 Featuring everything from sports stadiums to shopping malls hundreds of new cities in China stand empty with hundreds more set to be built by 2030 Between now and then the country's urban population will leap to over one billion as the central government kicks its urbanization initiative into overdrive In the process traditional social structures are being torn apart and a rootless semi displaced consumption orientated culture rapidly taking their place Ghost Cities of China is an enthralling dialogue driven on location search for an understanding of China's new cities and the reasons why many currently stand empty Empty Cities of the Full Moon Howard V.

Hendrix, 2002-08-06 Venturing into a universe different from where his previous novels Lightpaths Standing Wave and Better Angels were set Howard V Hendrix tackles one of life's most enduring questions What does it mean to be human In a dramatically altered near future the world's newest technology resurrects a plague of apparent global madness that not only destroys ten thousand years of urban civilization but also creates a world under the sway of the full moon and a human race transformed in astonishing ways

The Ghost Cities of Australia Julian Bolleter, 2018-05-02 This book examines failed new city proposals in Australia to understand the hurdles environmental societal and economic that have curtailed such visions The lessons from these relative failures are important because if projections for Australia's 21st century population growth are borne out we will need to build new cities this century This is particularly the case in northern Australia where the federal government projects a four fold increase in population in the next four decades The book aims that when we commence 21st century new city dreaming we have learnt from the mistakes of the past and are not doomed to repeat them

Abandoned Cities Everett Sinclair, AI, 2025-02-21 Abandoned Cities explores the compelling question of why thriving urban centers become deserted offering valuable insights for contemporary urban planning The book delves into the stories behind these silent ruins examining environmental factors like climate change and resource depletion alongside socio political dynamics such as economic collapse or conflict It highlights how architectural and planning missteps contribute to unsustainable urban environments emphasizing the precarious balance between humanity and the built world The book uniquely integrates historical analysis with modern urban planning moving beyond mere documentation to extract actionable lessons Case studies from diverse continents and eras reveal the environmental socio political and design related causes of abandonment For example resource depletion can render a city uninhabitable while political instability can trigger mass exodus These case studies are thematically grouped to explore the range of factors involved The book progresses by first establishing a theoretical framework and then moving into specific examples Ultimately Abandoned Cities provides practical recommendations for creating more resilient and adaptable urban environments By understanding past failures we can avoid repeating those mistakes and build more sustainable urban centers for the future Ghost Cities of China Wade Shepard, 2015-04-09 Featuring everything from sports stadiums to shopping malls hundreds of new cities in China stand

empty with hundreds more set to be built by 2030 Between now and then the country's urban population will leap to over one billion as the central government kicks its urbanization initiative into overdrive In the process traditional social structures are being torn apart and a rootless semi displaced consumption orientated culture rapidly taking their place Ghost Cities of China is an enthralling dialogue driven on location search for an understanding of China's new cities and the reasons why many currently stand empty

China's Engine of Environmental Collapse Richard Smith, 2020-07-20 As the world hurtles towards environmental oblivion China is leading the charge The nation's CO2 emissions are more than twice those of the US with a GDP just two thirds as large China leads the world in renewable energy yet it is building new coal fired power plants faster than renewables The country's lakes rivers and farmlands are severely polluted yet China's police state can't suppress pollution even from its own industries This is the first book to explain these contradictions Richard Smith explains how the country's bureaucratic rulers are driven by nationalist industrialist tendencies that are even more powerful than the drive for profit under normal capitalism In their race to overtake the US they must prioritise hyper growth over the environment even if this ends in climate collapse and eco suicide Smith contends that nothing short of drastic shutdowns and the scaling back of polluting industries especially in China and the US will suffice to slash greenhouse gas emissions enough to prevent climate catastrophe

Joshua 1-12 Thomas B. Dozeman, 2015-01-01 An acknowledged expert on the Hebrew Bible Thomas Dozeman offers a fresh translation of the Hebrew and Greek texts of the book of Joshua and explores the nature function and causes of the religious violence depicted

therein By blending the distinct teachings of Deuteronomy and the Priestly literature Dozeman provides a unique interpretation of holy war as a form of sacred genocide arguing that since peace in the promised land required the elimination of the populations of all existent royal cities a general purging of the land accompanied the progress of the ark of the covenant This essential work of religious scholarship demonstrates how the theme of total genocide is reinterpreted as partial conquest when redactors place Joshua an independent book between Deuteronomy and Judges The author traces the evolution of this reinterpretation of the central themes of religious violence while providing a comparison of the two textual versions of Joshua and an insightful analysis of the book s reception history Chinese Regions in Change Hong

Mazzetto,Attilio Petruccioli,2021-04-20 This publication aims to investigate the nature of social life in public and urban spaces in the cities of the Middle East considering the value of environmental approaches It aims to develop a better understanding of the patterns of social interactions and activities in public places which have been influenced by cultural heritage values Sustainable and livable open spaces can help in improving living conditions in cities Public spaces are relevant as they satisfy many human needs In public spaces people interact and meet people with different cultures and social backgrounds can communicate and learn from each other in social and spontaneous ways However decision makers tend to forget the value of public spaces especially in the absence of a national regulatory framework in emerging globalized cities The book provides a multi disciplinary approach in reading the characteristics and values of public spaces in the emerging cities of the Middle East 9/11 and the Visual Culture of Disaster Thomas Stubblefield,2014-12-17 An insightful

view on how 9 11 is perceived in American society the day that refuses to enter history the tragedy that has in effect not yet passed Journal of Popular Culture The day the towers fell indelible images of plummeting rubble fire and falling bodies were imprinted in the memories of people around the world Images that were caught in the media loop after the disaster and coverage of the attack its aftermath and the wars that followed reflected a pervasive tendency to treat these tragic events as

spectacle Though the collapse of the World Trade Center was the most photographed disaster in history it failed to yield a single noteworthy image of carnage Thomas Stubblefield argues that the absence within these spectacular images is the paradox of 9 11 visual culture which foregrounds the visual experience as it obscures the event in absence erasure and invisibility From the spectral presence of the Tribute in Light to Art Spiegelman s nearly blank New Yorker cover from the elimination of the Twin Towers from TV shows and films to the monumental cavities of Michael Arad s 9 11 memorial the void became the visual shorthand for the incident By examining configurations of invisibility and erasure across the media of photography film monuments graphic novels and digital representation Stubblefield interprets the post 9 11 presence of absence as the reaffirmation of national identity that implicitly laid the groundwork for the impending invasions of Iraq and Afghanistan A concise engaging and thought provoking work that asks the reader to reassess their knowledge and relationship to that moment and the resulting milieu of post 9 11 life in America ARLIS NA Reviews Extraordinarily brilliant will change how we think about disasters and tragedies The book is a must read for both students and practitioners of media studies Repository
