The Eye Of The Moon:

The Ancient Egyptian Book of the Moon: Coffin Texts Spells 154-160 Gyula Priskin, 2019-05-02 This book proposes that Coffin Texts spells 154 160 recorded at the beginning of the 2nd millennium BCE form the oldest composition about the moon in ancient Egypt and indeed the world Based on a new translation the detailed analysis of these spells reveals that they provide a chronologically ordered account of the phenomena of a lunar month **Eye of Stone: The Inheritors 1** Fletcher

Anthony, 2013-10-01 In the tradition of *The Clan of the Cave Bear* a fabulous story of ancient Java and the shaman Fern who reaches into the future The fiery mountain is gone In its place naked figures crouch within the dark mouth of a cave The faces are strange yet Fern knows them They inhabit a world of echoes alien yet familiar Fifty thousand years ago The People who for time immemorial have lived in the Javanese rainforests are driven from their ancestral hunting grounds by the invaders they call the Newcomers So begins the epic journey that will bring them to Australia They are The Inheritors the first humans to settle this southern land Present day Australia Fern is visited by two shamans of that past time They persuade her to join them on a pilgrimage of discovery a pilgrimage that will take her through a multitude of dangers and suffering to discover her links with those who have gone before In this remarkable debut Fletcher Anthony brings us a world that is magical and inhabited by the spirits It is also based on what is known of the people of ancient Java and how they came to leave their ancestral lands **The Moon in the Greek and Roman Imagination** Karen ní Mheallaigh, 2020-10-22 The Moon

exerted a powerful influence on ancient intellectual history as a playground for the scientific imagination This book explores the history of the Moon in the Greco Roman imaginary from Homer to Lucian with special focus on those accounts of the Moon its attributes and its inhabitants given by ancient philosophers natural scientists and imaginative writers including Pythagoreans Plato and the Old Academy Varro Plutarch and Lucian n Mheallaigh shows how the Moon s enigmatic presence made it a key site for thinking about the gaze erotic philosophical and scientific and the relation between appearance and reality It was also a site for hoax in antiquity as well as today Central issues explored include the view from elsewhere sel noskopia the relation of science and fiction the interaction between the beginnings of science in the classical polis and the imperial period and the limits of knowledge itself ***The Eye of the Lynx*** David Freedberg, 2003-08-01 Some years ago David

Freedberg opened a dusty cupboard at Windsor Castle and discovered hundreds of vividly colored masterfully precise drawings of all sorts of plants and animals from the Old and New Worlds Coming upon thousands more drawings like them across Europe Freedberg finally traced them all back to a little known scientific organization from seventeenth century Italy called the Academy of Linceans or Lynxes Founded by Prince Federico Cesi in 1603 the Linceans took as their task nothing less than the documentation and classification of all of nature in pictorial form In this first book length study of the Linceans to appear in English Freedberg focuses especially on their unprecedented use of drawings based on microscopic observation and other new techniques of visualization Where previous thinkers had classified objects based mainly on similarities of

external appearance the Linceans instead turned increasingly to sectioning dissection and observation of internal structures They applied their new research techniques to an incredible variety of subjects from the objects in the heavens studied by their most famous and infamous member Galileo Galilei whom they supported at the most critical moments of his career to the flora and fauna of Mexico bees fossils and the reproduction of plants and fungi But by demonstrating the inadequacy of surface structures for ordering the world the Linceans unwittingly planted the seeds for the demise of their own favorite method visual description as a mode of scientific classification Profusely illustrated and engagingly written *Eye of the Lynx* uncovers a crucial episode in the development of visual representation and natural history And perhaps as important it offers readers a dazzling array of early modern drawings from magnificently depicted birds and flowers to frogs in amber monstrously misshapen citrus fruits and more
