The Fertility Tree A Pregnant Submission:

Pregnancy and Birth Karen O'Donnell, 2024-08-30 Pregnancy is a period of time that institutes great change in the lives of those who are pregnant. Regardless of whether a pregnancy concludes with the birth of a live child or not, there are experiences that are common for many people who are pregnant. Yet as a site of theological reflection, pregnancy is underrepresented. This landmark book seeks to begin the conversation within theology about pregnancy, the positive and negative experiences, and the potential for pregnancy to be understood theologically. Chapters consider a number of avenues in this exploration: from early pregnancy loss to trauma in labour, from adoption to the end of reproductive years at the onset of menopause. Throughout this book, it seeks to understand the resources that theology brings to the experiences of pregnancy, as well as the situations of oppression and underrepresentation that currently exist. Allowing for intersections of race, parenting, childlessness, and disability, this book approaches pregnancy from different theological perspectives in order to complexify the theological response and engagement, as well as produce constructive resources for both the academy and the church. Contributors include Chine McDonald, Julie Gittoes, Margaret Kamitsuka, and Rachel Muers. **Dream Child** Regina Abt, Irmgard Bosch, Vivienne MacKrell, 2000. The broad scope of the dream material analyzed in this book allows the authors to touch upon many subjects associated with the nature of the psyche, not only those relevant to pregnant women. The careful interpretation of the amplificatory material drawn from a wide range of cultures also makes this an inspiring aid for the understanding of dreams, valuable to psychologists, doctors, midwives, or anyone else interested in this human subject.

Pregnancy and cardiovascular diseases Dhrubajyoti Bandyopadhyay, Avash Das, Adrija Hajra, Vinit Baliyan, Erin D. Michos, 2023-05-02 **Pruning the Genealogical Tree** Gian Balsamo, 1999. Based on the thesis that lineage and family succession are endemically exposed to spurious and collateral ramifications, it engages genealogy as a construct whose architecture is best exemplified in the trope of the genealogical tree: a modular assemblage of filiations whose branches, apparently all inclusive, hide the intricacy of exclusion, suppression, discrimination, abusive graftings.
