The Field Of Eu Internal Security Agencies:

The Field of the EU Internal Security Agencies Didier Bigo, 2007 This volume exemplifies the general theory of a field of professionals of security in the line of our first book *Illiberal Practices of Liberal Regimes* and proposes a map of the European internal security agencies Europol Eurojust Frontex OLAF It insists on the relations between the agencies in order to give a better idea of the flow of communication and strategic or operational decisions produced at the EU level as too often the audience has only monographs about these agencies Any researcher student NGO or policy maker interested in security in the EU will thus have a better idea of the relations between the agencies and a greater understanding of what is at stake with liberty security and justice in Europe Theorizing Internal Security in the European Union Raphael Bossong, Mark Rhinard, 2016-10-20 This edited volume offers different theories useful for understanding and explaining European Union cooperation on internal security matters Cooperation on such matters has not only flourished over the past two decades but more recently has also become one of the most politicised or contested areas of European integration Yet academic studies in the field remain predominantly empirical or not readily accessible to new scholars The book addresses this major gap by providing a theoretical primer with a palette of options for explaining a complicated issue area reaching across the divide of critical and more mainstream scholars that typically fragments discussion and debate *Theorizing Internal Security Cooperation in the European Union* offers accessible and authoritative contributions by some of the most distinguished scholars in the field Each chapter reviews the emergence of a major theoretical approach the current state of the art for that approach and the accompanying methodological considerations before providing an empirical illustration and an outlook on further research and dialogue with other perspectives This book will serve as a central reference for developing our understanding of EU internal security cooperation for exploring the ongoing transformation of statehood and for illuminating the contemporary evolution of the European Union **The field of the EU** Laurent Bonelli, 2008-02-01 This volume exemplifies the general theory of a field of professionals of security and proposes a map of the European internal security agencies Europol Eurojust Frontex OLAF It insists on the relations between the agencies in order to give a better idea of the flow of communication and strategic or operational decisions produced at the EU level as too often the audience has only monographs about these agencies Any person interested in security in the EU will thus have a better idea of the relations between the agencies Developing European Internal Security Policy Christian Kaunert, Sarah Léonard, 2014-06-03 The European Union EU is making strong inroads into areas of security traditionally reserved to states especially into internal security or Justice and Home Affairs The Area of Freedom Security and Justice AFSJ as it has been renamed in the Amsterdam Treaty has seen significant policy developments since the late 1990s In fact there has been no other example of a policy making area making its way so quickly and comprehensively to the centre of the treaties and to the top of the EU's policy making agenda After major treaty revisions in Maastricht Amsterdam Nice and finally the Lisbon

Treaty which entered into force on 1 December 2009 as well as an increased political impetus through the European Council Summits in Tampere 1999 the Hague 2004 and Stockholm 2009 the area appears as one of the most promising policy fields for integration in the EU in the foreseeable future This process has deepened even more significantly after the terrorist attacks on 11 September 2001 in the United States on 11 March 2004 in Madrid and on 7 July 2005 in London This book is the first to analyse these hugely topical developments in European internal security at both the treaty and policy levels as well as its implementation at the national level from various disciplinary perspectives political science law criminology etc This book was published as a special edition of *European Security* Madalina Busuioc, 2013-02-28

European agencies have been created at a rapid pace in recent years in a multitude of highly pertinent and sensitive fields ranging from pharmaceuticals and aviation safety to chemicals or financial supervision This agency phenomenon shows no signs of relenting and the trend in recent years is towards the delegation of ever broader powers These bodies meant to operate at arm's length from political control have real power and their opinions and decisions can have a direct impact on individuals regulators and member states Given the powers wielded by the agencies who is responsible for holding these non-majoritarian actors to account Is the growing concern surrounding agency accountability much ado about nothing or are we faced with the threat of a powerful and unaccountable bureaucracy These are precisely the questions that this book seeks to answer It thus addresses one of the most relevant topics in current European governance the accountability of European agencies Scholars have increasingly called attention to the risk of placing too much power in the hands of such agencies which operate at arm's length from traditional controls and cannot easily be held accountable for their actions Although this is a major issue of concern systematic empirical research into the topic is lacking This book addresses empirically whether and if so on what counts agency accountability is problematic It examines how the accountability system of European agencies operates at both the de jure as well as the de facto level through an examination of legal provisions relevant case law as well as policy documents and extensive interview material Reflecting on these findings the book also offers important theoretical insights for our understanding and study of accountability in a complex regulatory regime such as the EU context The book follows a multi disciplinary approach and is at the cutting edge of law and public administration

groundbreaking project constructs a comprehensive model of the intelligence community as a distorted epistemic community tailored to singularities of EU security policies and systemic arrangements provided by EU institutions and agencies *EU Borders and Shifting Internal Security* Raphael Bossong, Helena Carrapico, 2016-02-19 This edited volume analyzes recent key developments in EU border management In light of the refugee crises in the Mediterranean and the responses on the part of EU member states this volume presents an in depth reflection on European border practices and their political social and economic consequences Approaching borders as concepts in flux the authors identify three main trends the rise of security technologies such as the EUROSUR system the continued externalization of EU security governance such as border mission training in third states and the unfolding dynamics of accountability The contributions show that internal security cooperation in Europe is far from consolidated since both political oversight mechanisms and the definition of borders remain in flux This edited volume makes a timely and interdisciplinary contribution to the ongoing academic and political debate on the future of open borders and legitimate security governance in Europe It offers a valuable resource for scholars in the fields of international security and migration studies as well as for practitioners dealing with border management mechanisms
