The Fundamentals Of Architecture Second Edition:

The Fundamentals of Architecture Lorraine Farrelly, 2012-07-09 The Fundamentals of Architecture 2nd Edition is an introduction to the basic ideas that inform architecture. It is intended to unravel the complexity of architecture to explain its process and make it more accessible. It guides students through the rich history of the discipline and introduces aspects of contemporary theory and practice. The book explores the process of architecture starting from the initial ideas and concepts and how these ideas are informed by understanding site and context. It examines the impact of the physical environment and the historical ideas that have informed and influenced the architectural solution. The second edition has been redesigned and updated with new material including six case studies, exercise sections, and contemporary visuals from students and leading architects.

Game Engine Architecture, Second Edition Jason Gregory, 2014-08-15 Hailed as a must-have textbook CHOICE January 2010 the first edition of Game Engine Architecture provided readers with a complete guide to the theory and practice of game engine software development. Updating the content to match today's landscape of game engine architecture, this second edition continues to thoroughly cover the major components that make up a typical commercial game engine. New to the Second Edition: Information on new topics including the latest variant of the C programming language C 11 and the architecture of the eighth generation of gaming consoles the Xbox One and PlayStation 4. New chapter on audio technology covering the fundamentals of the physics mathematics and technology that go into creating an AAA game audio engine. Updated sections on multicore programming, pipelined CPU architecture and optimization, localization, pseudovectors, and Grassman algebra, dual quaternions, SIMD vector math, memory alignment, and anti-aliasing. Insight into the making of Naughty Dog's latest hit The Last of Us. The book presents the theory underlying various subsystems that comprise a commercial game engine, as well as the data structures, algorithms, and software interfaces that are typically used to implement them. It primarily focuses on the engine itself, including a host of low-level foundation systems: the rendering engine, the collision system, the physics simulation, character animation, and audio. An in-depth discussion on the gameplay foundation layer delves into the game's object model, world editor, event system, and scripting system. The text also touches on some aspects of gameplay programming, including player mechanics, cameras, and AI. An awareness-building tool and a jumping-off point for further learning. Game Engine Architecture Second Edition gives readers a solid understanding of both the theory and common practices employed within each of the engineering disciplines covered. The book will help readers on their journey through this fascinating and multifaceted field.

ARCHINESIA 5 Imelda Akmal (Editor in Chief), GOOD DESIGN IN ARCHITECTURE NOW One of the most important, quite dominant processes in architecture is the design process, and the goal of architecture design is to obtain good design. Good design has double meaning: aesthetic and ethic. In architecture, the two should be united as a single goal that a design process should strive for. Moreover, an architectural product does not only affect its client and architect. On a broader level, architectural products also affect their surrounding environments. In a

large scale they may even have an effect on the economy and the social and political condition The question is How does an architectural design attain the label good design We tried to find the answer through a round table discussion by inviting the two groups of professionals in Indonesia practitioners and academics What are their thought on this matter You can peruse them in the main coverage of Archnesia vol 5 Built Project in Southeast Asia House in Semarang Revano Satria Serenity House phuket Duangrit Bunnag Spiral House Surabaya Archimetric B House Bali d associates Recycled Wood House Jakarta Mamostudio 1 The Mori Bandung LABO Ize Hotel Bali Studio Tonton River Safari Singapore DP Architects Anjung Salihara Studiomasar Audi Centre Singapore Ong Ong Kineforum Misbar Jakarta Csutoras Liando Architravel special Scottish Parliament Building by Enric Miralles
