area throughout much of its history Among the first to exert strong influence on its political cultural infrastructural and demographic developments were the two major decentralized civilizations of the first millennium BCE the Phoenicians and the Greeks While trade and cultural exchange preceded their permanent presence it was the colonizing movement that brought territorial competition and political power struggles on the island to a new level The history of six centuries of colonization is replete with accounts of conflict and warfare that include cross cultural confrontations as well as interstate hostilities domestic conflicts and government violence This book is not concerned with realities from the battlefield or questions of military strategy and tactics but rather offers a broad collection of archaeological case studies and historical essays that analyze how political competition strategic considerations and violent encounters substantially affected rural and urban environments the island s heterogeneous communities and their social practices These contributions originating from a workshop in 2018 combine expertise from the fields of archaeology ancient history and philology The focus on a specific time period and the limited geographic area of Greek Sicily allows for the thorough investigation and discussion of various forms of organized societal violence and their consequences on the developments in society and landscape

**The Civilization of the Holocaust in Italy** Wiley Feinstein, 2003 This book studies the persecution of Italian Jews during the Fascist period in relation to the Italian cultural tradition It shows that Mussolini s anti Semitic laws and Italian support for Hitler s war on the Jews stem directly from beliefs deeply embedded in Italian culture After studying anti Judaic characterizations in the Christian tradition and representations of Jews by Dante and other Medieval and Renaissance authors the book shows how the anti Semitic tradition became reinvigorated in the nineteenth century cultural figures in the period between 1900 and 1940 the writer Giovanni Papini the Catholic educational leader Agostino Gemelli and the artist and critic Ardengo Soffici The book then examines Mussolini s specific anti Semitic policies and argues that the Italian cultural system contributed to generating the evil that led to the Holocaust Wiley Feinstein is Associate Professor of Italian at Loyola University Chicago

Race and Narrative in Italian Women's Writing Since Unification Melissa Coburn, 2013-07-29 Race as Narrative in Italian Women s Writing Since Unification explores racist ideas and critiques of racism in four long narratives by female authors Grazia Deledda Matilde Serao Natalia Ginzburg and Gabriella Ghermandi who wrote in Italy after national unification Starting from the premise that race is a political and socio historical construction Melissa Coburn makes the argument that

race is also a narrative construction This is true in that many narratives have contributed to the historical construction of the idea of race it is also true in that the concept of race metaphorically reflects certain formal qualities of narration Coburn demonstrates that at least four sets of qualities are common among narratives and central to the development of race discourse intertextuality the processes of characterization plot and tropes the tension between the projections of individual group and universal identities and the processes of identification and otherness These four sets of qualities become organizing principles of the four sequential chapters paralleling a sequential focus on the four different narrative authors The juxtaposition of these close contextualized readings demonstrates salient continuities and discontinuities within race discourse over the period examined revealing subtleties in the historical record overlooked by previous studies

*Shakespeare and the Italian Renaissance* Michele Marrapodi, 2016-04-01 Shakespeare and the Italian Renaissance investigates the works of Shakespeare and his fellow dramatists from within the context of the European Renaissance and more specifically from within the context of Italian cultural dramatic and literary traditions with reference to the impact and influence of classical coeval and contemporary culture In contrast to previous studies the critical perspectives pursued in this volume s tripartite organization take into account a wider European intertextual dimension and above all an ideological interpretation of the aesthetics or politics of intertextuality Contributors perceive the presence of the Italian world in early modern England not as a traditional treasure trove of influence and imitation but as a potential cultural force consonant with complex processes of appropriation transformation and ideological opposition through a continuous dialectical interchange of compliance and subversion **Touro Law Review** ,2000 La rethorique diuine de Guillaume de paris... translatee de latin en françois par... adrian Gemelli...
