*The Rise of the Human Digital Brain* Beatriz Pacheco, 2018-08-01 Cover Design By Rebecca Gibson Jones It is estimated that up to sixty five percent of children entering grade school this year will end up working in careers that have yet to be created This is a result in part of the rapid advances in technology that have occurred since Apple introduced the iPhone just ten years ago This technology is not only impacting the way that we learn or the jobs that we will hold in the future but it is literally changing the way that we think As modern technologies are introduced during formative periods of brain development they are having an impact on traditionally linear patterns of thought Today's youth no longer process information in the same linear fashion as past generations This is creating confusion in educational settings that are specifically designed to meet the needs of linear thinkers Administrators educators and parents must learn to better understand these changes in order to create models that will be viable for 21st century learners We must work together to create systems that will both support and encourage children who literally think differently than those who teach them

*The Rise of the Human Digital Brain: How Multidirectional Thinking is Changing the Way We Learn* contains information about the history of education the changes in the systems of education over the years and the impact of technology on learning for 21st century students It also contains the results of a unique study regarding the impact of iPad instruction on literacy attainment for struggling readers The hope is that the information contained in this book will cause administrators educators parents and developers of new technologies to take a moment to step back and envision a new model that will revolutionize education across the world Praise for *The Rise of the Human Digital Brain* Beatriz Pacheco's experience as both a researcher and a practitioner in the field of education lends an authenticity to her writing that is both refreshing and enlightening She has conducted one of the most comprehensive studies to date concerning the use of the iPad for direct instruction and the results of her study have the potential to influence the teaching of literacy skills on the national level I highly recommend this book
