The Origin Of Violence:

The Origin of Violence Fabrice Humbert, 2011 During a school trip to Buchenwald concentration camp a young French teacher comes across a photograph of a man whose resemblance to his own father Adrien is uncanny However the man has a different name and died in 1942 Returning to France he finds that the memory of the photograph refuses to leave him He decides to embark on a search for its subject which takes him to the Buchenwald archives to the heart of the Nazi machine but more disturbingly draws him into the dark heart of his own family Eventually he is brought face to face with his own capacity for violence A subtle moving book *The Origins of Violence* shows the limitless ways in which humans inflict harm on each other and how individual people not societies are the perpetrators

The Origins of Violence Anatol Rapoport, 1994-12-31 In this fundamental analysis Rapoport asks Why do we have wars Doesn't humanity always seem on the verge of self annihilation Is there something in human genetic structure that makes people want to kill each other Perhaps this impulse is a matter of good versus evil or just plain human nature Rapoport moves beyond clichés by claiming that the sources of modern violence reside in the imbalance between a lag in the system of values inherited from the past and the structure of science and technology that awaits no revision of values to move ahead As a result Rapoport argues that the study of war and peace should be considered a science just like biology or for that matter political science The same rules of empirical engagement and experimentation should apply Before we can have a theory of peace we need a methodology of conflict Using the writings of thinkers who have made significant contributions to the predominant ideas and ideals of our society Rapoport weaves together the strands of independent thought and research into a single thought provoking work After investigating the whys of violence using ideological psychological strategic and systemic perspective Rapoport moves to an in depth analysis of possible varieties of conflict resolution He explores such mechanisms as mediation education and applying the results of scientific research He documents the impact of ideologies countervailing dominant ones that place obstacles in the way of peacemaking Rapoport argues that conciliation and game theories can be utilized to replace the concept of winner take all or total victory *The Origins of Violence* is a needed contribution to our understanding of warfare and provides a forward looking perspective that can be of wide use to each of the policy sciences starting with military strategy and ending with international development

Joseph Mary Ory,1918 *Railroad Worker* ,1916 Writing and Difference Jacques Derrida,2021-01-27 First published in 1967 Writing and Difference a collection of Jacques Derrida s essays written between 1959 and 1966 has become a landmark of contemporary French thought In it we find Derrida at work on his systematic deconstruction of Western metaphysics The book s first half which includes the celebrated essay on Descartes and Foucault shows the development of Derrida s method of deconstruction In these essays Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought one of his main targets being the way in which structuralism unwittingly repeats metaphysical concepts in its use of linguistic models The second half of the book contains some of Derrida s most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language finally showing metaphysics to be constituted by this exclusion These essays on Artaud Freud Bataille Hegel and L vi Strauss have served as introductions to Derrida s notions of writing and diff rence the untranslatable formulation of a nonmetaphysical concept that does not exclude writing for almost a generation of students of literature philosophy and psychoanalysis Writing and Difference reveals the unacknowledged program that makes thought itself possible In analyzing the contradictions inherent in this program Derrida foes on to develop new ways of thinking reading and writing new ways based on the most complete and rigorous understanding of the old ways Scholars and students from all disciplines will find Writing and Difference an excellent introduction to perhaps the most challenging of contemporary French thinkers challenging because Derrida questions thought as we know it The History of Civilization from the Fall of the Roman Empire to the French Revolution ... group human behaviours Examining this behavioural tension this book argues that while these innate features set up behaviours that lean towards aggression influenced by social inequalities the means implemented to defuse them resort to emotional and intellectual strategies that sponsor fanaticism and often reproduce the very same behaviours they intend to defuse In addressing these concerns the book argues that we should enhance our resources to promote solidarity accept cultural differences deter expansionist and uncontrolled profit drives and achieve collective access towards knowledge and progress in living conditions This entails promoting the redistribution of resources and creative labour access and avoiding policies that generate a fragmented world with collective and individual development disparities that invite and encourage dominance behaviours This resource redistribution asserts that it is necessary to reformulate the global set of human priorities towards increased access to better living conditions cognitive enhancement a more amiable interaction with the ecosystem and non aggressive cultural differences promote universal access to knowledge and enhance creativity and cultural convivence These behavioural changes entail partial derangement of our ancestral animal drives camouflaged under different cultural profiles until the species succeeds in replacing the dominance of basic animal drives with prosocial collective ones Though it entails a formidable task of confronting financial military and religious powers and cultural inertias human history is also a challenging continuous experience in these domains for the sake of our own self identity and self evaluation we should reject any suggestion of not continuing embracing slowly constructing collective utopias channelled towards improving individual and collective freedom and creativeness This book will interest academics and students in social cognitive and evolutionary psychology the neurosciences palaeoanthropology philosophy and anthropology
