newspapers of the day often under an array of different titles prior to being published by Collins and Dodd Mead and Company. Second serial rights could result in a single title being syndicated to over 40 newspapers. Over the decades, numerous records have been lost or destroyed, and keeping track of her literary legacy has proved a major challenge for her publishers, literary agents, and others. Until now, Jared Cade, author of the ground-breaking biography *Agatha Christie and the Eleven Missing Days*, has unearthed a huge plethora of hitherto unknown facts about the timeline of her publishing history that will delight her devotees and enable future generations to write about her work with far greater authority and accuracy than ever before. Especially when correlating her publications to the parallels in her life, *Illustrated with rare pictures: Secrets from the Agatha Christie Archives* is destined to become an essential reference tool for fans, librarians, scholars, antiquarian booksellers, broadcasters, and others interested in the making of one of the 20th century's most beloved writers. Jared Cade is an acknowledged authority on Christianna Crime Time.

The Double Bind in Physics Education Maria Ong, 2023-05-09. An incisive study of the mechanisms reinforcing the underrepresentation of women of color in STEM fields and a call for systemic change to address the imbalance. In a detailed exploration of inclusion in physics, social scientist Maria Ong makes the case for far-reaching higher education reform, noting that despite diversity efforts to recruit more women and students of color into science and mathematics programs, many leave the STEM pipeline. *The Double Bind in Physics Education* takes readers inside the issue by following 10 women of color from their entrance into the undergraduate physics program at a large research university through their pursuit of various educational and career paths. Candid interviews with these women, their instructors, and mentors, and their peers, conducted over 25 years, allow Ong to trace how pervasive challenges such as navigating the intersectionality of race and gender discrimination have shaped their academic opportunities and career choices. Despite the ideals of objectivity promoted in STEM disciplines, the women profiled here encounter continued patterns

of systemic oppression within their departments In their stories Ong identifies overt behaviors and microaggressions that harass exclude and otherwise disadvantage women of color and members of other minoritized groups Ong also shows how aids such as student support programs peer groups allies and mentors which are centered on the individual can go only so far toward a sustainable solution In order to provide equitable opportunities she argues greater work must be done to dismantle institutional norms and replace them with a culture of inclusion
