The Environmental Ethics And Policy Book 3rd Edition:

The Environmental Ethics and Policy Book Donald VanDeVeer, Christine Pierce, 1994 This text is designed for students who wish to explore in depth questions about how on earth we ought to live e g how we can behave responsibly toward nonhumans and toward the planet Although primarily oriented toward questions of ethics broadly understood and approached philosophically the volume crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues It seeks to extract for critical attention the relevant moral or normative presuppositions which lie behind policy recommendations whether they are ones made by biologists ecologists economists phiolosophers engineers public officials or anyone concerned with policy decisions *The Environmental Ethics and Policy Book Philosophy, Ecology, Economics* ,2015 Using a philosophical approach this book explores ethical aspects of the treatment of nonhumans the planet and its resources by humans Questions of what we have done to the planet what we are doing now and what should be done differently are explored as is the question as to whether beings other than humans have a value of their own not just one assigned by humans Gary Bryner, The Historical Dictionary of Environmentalism strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries *The Environmental Ethics and Policy Book* Donald VanDeVeer, Christine Pierce, 1998 This text and sourcebook crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues while taking a broad view of questions of ethics It is appropriate and valuable not only for philosophy and environmental science students but also for students of economics biology engineering and public policy *African Philosophy and Environmental Conservation* Jonathan Chimakonam, 2017-10-04 African Philosophy and Environmental Conservation is about the unconcern for and marginalisation of the environment in African philosophy The issue of the environment is still very much neglected by governments corporate bodies academics and specifically philosophers in the sub Saharan Africa The entrenched traditional world views which give a place of privilege to one thing over the other as for example men over women is the same attitude that privileges humans over the environment This culturally embedded orientation makes it difficult for stake holders in Africa to identify and confront the modern day challenges posed by the neglect of the environment In a continent where deep rooted cultural and religious practices as well as widespread ignorance determine human conduct towards the environment it becomes difficult to curtail much less overcome the threats to our environment It shows that to a large extent the African cultural privileging of men over women and of humans over the environment somewhat exacerbates and makes the environmental crisis on the continent intractable For example it raises the challenging puzzle as to why women in Africa are the ones to plant the trees and men are the ones to fell them

Contributors address these salient issues from both theoretical and practical perspectives demonstrating what African philosophy could do to ameliorate the marginalisation which the theme of environment suffers on the continent Philosophy is supposed to teach us how to lead the good life in all its forms why is it failing in this duty in Africa specifically where the issue of environment is concerned This book which trail blazes the field of African Philosophy and Environmental Ethics will be of great interest to students and scholars of Philosophy African philosophy Environmental Ethics and Gender Studies
