The Fight For Utopia:

UTOPIA'S SUICIDE John Paul, 2013 Having one foot in North America and one in Europe the author inevitably compares these two continents their surroundings their people and their modus vivendi The interpretation of happenings on these continents as they relate to one life s adventure is the scope of this work which is before everything else a collage of personal biography illuminated by flashes of the remarkable historical moments preceding the emigration There are moreover interpretations of impressions colored with romantic enchanting mysticism and alternatively subjective impressions of immigrants who came to America to find a better life and expected to some extent to find a promised land on a platter In either case impressions are based on predispositions of what immigrants from the old country envisioned American to be like However gratia is not a prerequisite it does not exist in the meaning of emi nor immi gratia Is this memoir an unprejudiced evaluation and objective notation of experiences as they were or a biased overflow of emotions ridicule and sarcasm or delight and adornment What is the difference between autobiography memoir and diary versus a fictitious rather historical novel in the first place A degree of deviation from factual reality A conglomerate relatively dry when transferred onto paper this cacophony without regard to categorization may enlighten the mind of one American or one potential immigrant by informing or reforming the picture of the mirage of a once magical New World or the romanticism of the Old One

France and the Spanish Civil War Mr Martin Hurcombe, 2013-05-28 In this wide ranging study of French intellectuals who represented the Spanish Civil War as it was happening and in its immediate aftermath Martin Hurcombe explores the ways in which these individuals addressed national anxieties and shaped the French political landscape Bringing together reportage essays and fiction by French supporters of Franco's Nationalists and of the Spanish Republic Hurcombe shows the multifaceted ways in which that conflict impacted upon French political culture He argues that French cultural representations of the war often articulated a utopian image of the Nationalists or of the Spanish Republic that served as models behind which the radical right or the radical left in France might mobilise His book will be of interest not only to scholars of French literature and culture but also to those interested in how events unfolding in Spain found an echo in the political landscapes of other countries

Knowledges Born in the Struggle Boaventura de Sousa Santos, Maria Meneses, 2019-10-17 In a world overwhelmingly unjust and seemingly deprived of alternatives this book claims that the alternatives can be found among us These alternatives are however discredited or made invisible by the dominant ways of knowing Rather than alternatives therefore we need an alternative way of thinking of alternatives Such an alternative way of thinking lies in the knowledges born in the struggles against capitalism colonialism and patriarchy the three main forms of modern domination In their immense diversity such ways of knowing constitute the Global South as an epistemic subject The epistemologies of the South are guided by the idea that another world is possible and urgently needed they emerge both in the geographical north and in the geographical south whenever collectives of people fight against modern domination Learning from and with the epistemic South suggests that the alternative to a general theory is the promotion of an ecology of knowledges based on intercultural and interpolitical translation

Imagining Peace Ben Lowe, 2010-11-01 In this book Ben Lowe examines the developing language of peace in late medieval and Renaissance England He challenges the popular assumption that this was simply an age of war during which ideas of peace exercised very little impact on society and government He offers a close reading of English writers on peace integrating this analysis with careful attention to the political context particularly during times of war when calls for peace were more vocal Lowe traces the concept of peace from its early Christian usage up to the sixteenth century He focuses on the long period of foreign wars 1349 1560 often punctuated by domestic unrest when theories of peace were increasingly discussed within the larger context of war and policymaking Such practical concerns invariably led to a richer and more varied peace discourse For instance Lowe is able to show a shift in discussion away from platitudes such as the restoration of goodwill among Christians toward a more hard headed set of foreign policy problems such as famine inflation disruption of trade and the maintenance of the king s honor He draws on an extraordinarily wide variety of sources including theological and philosophical works sermons official prayers moral treatises commentaries military handbooks legal texts state papers chronicles fiction popular ballads diaries and personal letters *Imagining Peace* will appeal to others beyond historians of late medieval and early modern England Lowe applies methods from other disciplines especially literary and cultural studies and political theory His analysis takes into account the problems and limitations of reconstructing past thought and determining authorial intent Nonetheless the text remains
