Imperative Robert Zemsky and Susan Shuman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education. Instead of functioning as a single integrated industry, higher education is in fact a collection of segmented and more or less separate markets. These markets have their own distinctive operating constraints and logics, especially regarding price. But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared, the victim of weak imaginations, insufficient funding, and an aversion to targeted investment. Chapter by chapter, this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape: how the market for higher education distributes students among competing institutions; what the job market is looking for; how markets differ across the fifty states; and how the higher education market determines the kinds of faculty at different kinds of institutions. The volume concludes with a three-pronged set of policies for making American higher education mission-centered as well as market-smart. Although there is no one-size-fits-all approach for reforming higher education, this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education. *College Planning for Gifted Students* Sandra L.

Berger, 2021-09-03 *College Planning for Gifted Students: Choosing and Getting Into the Right College* is a must-have for any gifted or advanced learner planning to attend college. Sandra Berger, a nationally recognized expert on college and career planning for gifted students, provides a hands-on practical guide to college planning in this updated edition of the best-selling *College Planning for Gifted Students*. Berger focuses specifically on helping gifted students discover who they are and how that discovery corresponds to the perfect postsecondary endeavor. The author also provides useful practical advice for writing college application essays, requesting recommendation letters, visiting colleges, and acing the college entrance interview. Throughout the book, helpful timelines and checklists are provided to give students and their parents, teachers, and counselors assistance in planning for and choosing the right college. Grades 9-12. **Becoming a Professor** Marie K. Iding, R. Murray

Thomas, 2015-03-08 *Becoming a Professor* is designed primarily for graduate and undergraduate students and others: instructors, lecturers, and new tenure-track professors contemplating careers as professors in post-secondary education at colleges, institutes, and universities. The book identifies kinds of higher education institutions and types of teaching positions, along with the nature of each position's responsibilities and advantages and disadvantages. It explains how graduate students can promote their future as faculty members while they are still in graduate school and suggests ways to find suitable faculty positions and succeed at the application and interview process. The book also addresses a range of other matters that influence careers in higher education: once a candidate is hired in a faculty position, such matters as the tenure and promotion process and how to succeed in other aspects of the professorial role: research, service, teaching, and as well as how to avoid pitfalls, political and ethical aspects in such positions. **The Fiske Guide to Colleges** 1997 Edward B.

Using Evidence of Student Learning to Improve Higher Education George D. Kuh, Stanley O. Ikenberry, Natasha A. Jankowski, Timothy Reese Cain, Peter T. Ewell, Pat Hutchings, Jillian Kinzie, 2015-01-20 American higher education needs a major reframing of student learning outcomes assessment Dynamic changes are underway in American higher education New providers emerging technologies cost concerns student debt and nagging doubts about quality all call out the need for institutions to show evidence of student learning From scholars at the National Institute for Learning Outcomes Assessment NILOA Using Evidence of Student Learning to Improve Higher Education presents a reframed conception and approach to student learning outcomes assessment The authors explain why it is counterproductive to view collecting and using evidence

of student accomplishment as primarily a compliance activity Today's circumstances demand a fresh and more strategic approach to the processes by which evidence about student learning is obtained and used to inform efforts to improve teaching learning and decision making Whether you're in the classroom an administrative office or on an assessment committee data about what students know and are able to do are critical for guiding changes that are needed in institutional policies and practices to improve student learning and success Use this book to Understand how and why student learning outcomes assessment can enhance student accomplishment and increase institutional effectiveness Shift the view of assessment from being externally driven to internally motivated Learn how assessment results can help inform decision making Use assessment data to manage change and improve student success Gauging student learning is necessary if institutions are to prepare students to meet the 21st century needs of employers and live an economically independent civically responsible life For assessment professionals and educational leaders Using Evidence of Student Learning to Improve Higher Education offers both a compelling rationale and practical advice for making student learning outcomes assessment more effective and efficient The Fiske Guide to Colleges 2001 Edward B. Fiske, 2000-08-15 Draws on interviews with administrators and students to furnish data on three hundred of the country's most prominent colleges

Liberal Learning and the Art of Self-Governance Emily Chamlee-Wright, 2015-11-19 Concerns over affordability and accountability have tended to direct focus away from the central aims of liberal learning such as preparing minds for free inquiry and inculcating the habits of mind practical skills and values necessary for effective participation in civil society The contributors to this volume seek to understand better what it is that can be done on a day to day basis within institutions of liberal learning that shape the habits and practices of civil society The central argument of this volume is that institutions of liberal learning are critical to a developing and flourishing civil society It is within these civil society incubators that the habits of open discourse are practiced and honed that a collaborative often contentious commitment to truth seeking serves as the rules that govern our work together that the rules of personal and widespread social cooperation are established practiced and refined Many have made this argument as it relates to community based learning and we explore that theme here as well But acquiring and practicing the habits of civil society recur within and throughout the college context in the classrooms in college governance structures in professional associations in collaborative research in the residence halls and on the playing field To put it another way when they are at their best institutions of liberal learning are contexts in which students learn how to live in a free society and learn the art of self governance
