Literary Bioethics Maren Tova Linett, 2020-07-14 Uses literature to understand and remake our ethics regarding nonhuman animals old human beings disabled human beings and cloned posthumans Literary Bioethics argues for literature as an untapped and essential site for the exploration of bioethics Novels Maren Tova Linett argues present vividly imagined worlds in which certain values hold sway casting new light onto those values and the more plausible and well rendered readers find these imagined worlds the more thoroughly we can evaluate the justice of those values In an innovative set of readings Linett thinks through the ethics of animal experimentation in H G Wells s *The Island of Doctor Moreau* explores the elimination of aging in Aldous Huxley s *Brave New World* considers the valuation of disabled lives in Flannery O Connor s *The Violent Bear It Away* and questions the principles of humane farming through reading Kazuo Ishiguro s *Never Let Me Go* By analyzing novels published at widely spaced intervals over the span of a century Linett offers snapshots of how we confront questions of value In some cases the fictions are swayed by dominant devaluations of nonnormative or nonhuman lives while in other cases they confirm the value of such lives by resisting instrumental views of their worth views that influence explicitly or implicitly many contemporary bioethical discussions especially about the value of disabled and nonhuman lives Literary Bioethics grapples with the most fundamental questions of how we value different kinds of lives and questions what those in power ought to be permitted to do with those lives as we gain unprecedented levels of technological prowess

Unnaturally Delicious Jayson Lusk, 2016-03-22 The food discussion in America can be quite pessimistic With high obesity rates diabetes climate change chemical use water contamination and farm animal abuse it would seem that there wasn t very much room for a positive perspective The fear that there just isn t enough food has expanded to new areas of concern about water availability rising health care costs and dying bees In *Unnaturally Delicious* Lusk makes room for optimism by writing the story of the changing food system suggesting that technology and agriculture can work together in a healthy and innovative way to help solve the world s largest food issues and improve the farming system as we know it This is the story of the innovators and innovations shaping the future of food You ll meet an ex farmer entrepreneur whose software is now being used all over the world to help farmers increase yields and reduce nutrient runoff and egg producers who ve created new hen housing systems that improve animal welfare at an affordable price There are scientists growing meat in the lab Without the cow College students are coaxing bacteria to signal food quality and fight obesity Nutrient enhanced rice and sweet potatoes are aiming to solve malnutrition in the developing world Geneticists are creating new wheat varieties that allow farmers sustainably grow more with less And we ll learn how to get fresh tasty 3D printed food at the touch of a button perhaps even delivered to us by a robotic chef Innovation is the American way Thomas Jefferson George Washington Carver and John Harvey Kellogg were food and agricultural entrepreneurs Their delicious innovations led to new healthy tasty convenient and

environmentally friendly food The creations were unnaturally delicious Unnatural because the foods and practices they fashioned were man made solutions to natural and man made problems Now the world is filled with new challenges changing the way we think about food Who are the scientists entrepreneurs and progressive farmers who meet these challenges and search for solutions Unnaturally Delicious has the answers *Voir son steak comme un animal mort* Martin

McWilliams,2018-05-08 A bold and bracing argument for the complete reimagining of the human diet by the critically acclaimed author of *Just Food* The human practice of farming food has failed There are 7 500 known varieties of domesticated apples we regularly eat about five Seventy five percent of the world s food derives from five animals and twelve plants Factory farmed meat is a major source of greenhouse gas emissions about 14 percent larger than transportation and consumes 75 percent of the water in drought prone regions such as the West We are struck in a rut of limited choices ad the vast majority of what we eat is detrimental to our health and the welfare of the planet But what if we could eliminate agriculture as we know it What if we could start over James McWilliams s search for more expansive palate leads him to those who are actively exploring the fringes of what we can eat a group of outliers seeking nutrition innovation outside the industrial food system Here we meet insect manufacturers seaweed harvesters road kill foragers plant biologists and oyster farmers who seek to open both our minds and our mouths and to overturn our most basic assumptions about food health and ethics *Eating Promiscuously* generates hope for a more tasteful future one in which we eat thousands of foods rather than dozens with a new philosophy that could save both ourselves and our planet *Youth's Companion* ,1906 *Eating Animals*
