The New Economic History Of The Railways Routledge Revivals:

The New Economic History of the Railways (Routledge Revivals) Patrick O'Brien, 2014-11-13 The book first published in 1977 contrasts new and older approaches to the history of transport and outlines a critical exposition of the methods used to quantify the contribution of railways to economic growth by means of counterfactual speculation and the measurement of social savings The author also outlines and appraises an alternative measure of the impact of railways namely the social rate of return on capital invested in railways The final chapters are concerned with the effects on growth generated by the construction and diffusion of railways through expenditure on labour capital goods and industrial inputs and through their effects on the integration of markets and patterns of location [An Economic History of Liberal Italy](#)

(Routledge Revivals) Gianni Toniolo, 2014-10-14 This book first published in 1990 examines Italy's economic history from its Unification in 1850 to the end of the First World War Particular attention is paid to the extent to which Italy exhibits the features of Kaznets's model of modern economic growth [An Economic History of Liberal Italy](#) begins with a quantitative assessment of Italy's long term growth in this period All of the main relevant variables including production consumption investment foreign trade government spending and welfare are discussed The book proceeds through a chronological account of the developments of the economy during this period and concludes with a critical survey of the relevant historiography Throughout the book emphasis is given to structural changes to developments in the main industries to the relations between different sectors of the economy and to economic policies This book is ideal for those studying economics of Italian history *The New Economic History of the Railways* Patrick Karl O'Brien, 1977-01-01 [The Economics of the Industrial Revolution](#) (Routledge Revivals) Joel Mokyr, 2018-07-18 In recent years scholars from a variety of disciplines have addressed many perplexing questions about the Industrial Revolution in all its aspects Understandably economics has become the focal point for these efforts as professional economists have sought to resolve some of the controversies surrounding this topic First published in 1985 this collection contains ten key essays written by leading economists on the subject of the Industrial Revolution Among the questions discussed are the causes for the pre eminence of Britain the roles of the inputs for growth capital labor technical progress the importance of demand factors the relation between agricultural progress and the Industrial Revolution and the standard of living debate The essays demonstrate that the application of fresh viewpoints to the literature has given us a considerable new body of data at our disposal making it possible to test commonly held hypotheses In addition this new data has enabled economists to apply a more rigorous logic to the thinking about the Industrial Revolution thus sharpening many issues heretofore blurred by slipshod methodology and internal inconsistencies

Man and the Social Sciences (Routledge Revivals) William Alexander Robson, 2014-02-04 One of the most significant movements in the world of learning in the twentieth century was the rise and development of the social sciences However few attempts have been made to see how far social scientists have travelled on the road to studying and understanding

human society First published in 1972 the lectures reprinted in this book aim to trace the development of the social sciences during the twentieth century and to show the role of the London School of Economics and Political Science in this development since it was founded in 1895 Each of the very distinguished lecturers was asked to take the larger view to be critical where necessary to treat his subject in the context of the world of learning The result is a survey of exceptional interest in which the growth of the social sciences is analysed from a number of contrasting viewpoints each of which ranges widely and often with provocative brilliance over themes that are of general concern The introduction by Professor W A Robson which was not part of the original lecture series is in itself a critical assessment of the field that will be read with close attention Historians, Economists, and Economic History (Routledge Revivals) Alon Kadish,2010-11-30 First

published in 1989 Alon Kadish s study re examines the standard view held by historians of economic thought whereby economic history emerged from the historicist criticism of neoclassical economic theory He also demonstrates how the discipline evolved as an extension of the study of history The study will appeal to students and scholars in historiography the development of higher education and in the history of economic thought in general as well as all those interested in the evolution of Oxford and Cambridge **An Economic History of Modern France (Routledge Revivals)** Francois

Caron,2014-06-03 First published in 1979 this richly documented study of French development from the early nineteenth century to the present day is of particular importance to students both of history and economics Francis Caron moves as confidently through the fields of current economic policy and modern economics as he does through the traditional subject matter of French nineteenth century economic history His book incorporates the mass of research that has appeared in monograph and periodical form in recent years making it accessible for the first time to the English speaking reader

World Intellectual Property Report World Intellectual Property Organization,2015 WIPO s latest World Intellectual Property Report WIPR explores the role of IP at the nexus of innovation and economic growth focusing on the impact of breakthrough innovations Building Capitalism (Routledge Revivals) Linda Clarke,2012-12-06 First published in 1992 this Routledge Revival sees the reissue of a truly original exploration of the nature of urbanization and capitalism Linda Clarke s vital work argues that Urbanization is a product of the social human labour engaged in building as well as a concentration of the labour force The quality of the labour process determines the development of production Changes to the built environment reflect changes in the production process and in particular the development of wage labour To support these arguments the author identifies a qualitatively new historical stage of capitalist building production involving a significant expansion of wage labour and hence capital and the transition from artisan to industrial production Linda Clarke draws from a wide range of original material relating to the development of London from the mid eighteenth to the early nineteenth century to provide a complete description of the development process materials extraction roadbuilding housebuilding paving cleansing etc profiles of builders and contractors involved and a picture of the new working class communities as in Somers

Town their living conditions population working environment and politics Routledge Revivals: Poor Labouring Men (1985) Alun Howkins,2016-10-04 First published in 1985 this book presents the first detailed account of the relationship between the farmworkers trades unionism and political and social radicalism Rural radicalism one of the most important new features of late nineteenth and early twentieth century politics was particularly strong in Norfolk and as such provides the focus for this study The author shows the how relationship between master and man and man and work was changing in the period from the 1870s to the 1920s ending with the great strike of 1923 The main themes are the shifts from religion to politics from Liberalism to Labour and in more general terms from local to national consciousness The book shows men at work and the ways in which politics meshed or failed to mesh together Based on detailed local research and on many hours of recorded interviews it enables the voice of the labourer to be heard and a real sense of hope fear and aspiration to come through **Systems Of Deceit: Financial Fraud And Scandal In The United Kingdom, 1700-2010** Steven Toms,2024-02-28 Financial fraud is a serious and seemingly intractable problem Financial scandals regularly punctuate newspaper headlines and regulators and auditors appear bereft of effective responses But has this always been the case This book quantifies financial crime in the UK using three centuries of data It demonstrates how financial fraud and scandal vary according to systematic economic and institutional arrangements In doing so it retells the history of British capitalism from the mercantilism of the eighteenth century to the financial capitalism of the twenty first century illustrating the often negative consequences of economic ideology policy and structure It identifies periods when fraud has been less problematic and contrasts these with times when it has surged The variation of outcomes reflects the balance of power between the state industrial and financial sectors the provision of credit through risky lending and the effectiveness of audits Rogue traders and other flawed individuals are frequently the focus of blame narratives constructed with the intention of deflecting comprehensive systematic reforms A Guide to the Printed Materials for English Social and Economic History, 1750-1850 Judith Blow Williams,1926 The Journal of European Economic History ,2000 **A Comparative History of Commerce and Industry, Volume II** David E. McNabb,2016-01-26 A Comparative History of Commerce and Industry Volume II offers a subjective review of how the cultural social and economic institutions of commerce and industry evolved in industrialized nations to produce the institution we now know as business enterprise *Economics and Politics in the Robotic Age* Qing-Ping Ma,2024-01-03 This book shows that the rapid development of artificial intelligence AI and robotics is a natural consequence of the development of human society It examines the history of production from the Stone Age to the present progressing from the manual age to the machine age and then to the robotic age From the perspective of economics and human physiology this book explains how AI and robotics will reshape the economy and society and how individuals firms and governments should prepare for the advent of the robotic age **The Interwar World** Andrew Denning,Heidi J.S. Tworek,2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss analyze and

interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume s contributors challenge the era s accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history

Engineer of Revolutionary Russia Anthony Heywood, 2016-05-13 This book is the first substantial study in any language of one of revolutionary Russia s most distinguished and controversial engineers Iurii Vladimirovich Lomonosov 1876 1952 Not only does it provide an outline of his remarkable life and career it also explores the relationship between science technology and transport that developed in late tsarist and early Soviet Russia Lomonosov s importance extends well beyond his scientific and engineering achievements thanks to the rich variety and public prominence of his professional and political activities His generation Lenin s generation was inevitably at the forefront of Russian life from the 1910s to the 1930s and Lomonosov took his place there as one of the country s best known and ultimately notorious engineers As well as an innovative engineer who campaigned to enhance the role of science he played a major role in shaping and administering the Russian railways and undertook several diplomatic and scientific missions to the West during the early years of the Revolution Falling from political favour during an assignment in Germany 1923 1927 he achieved notoriety in Russia as a non returner by apparently declining to return home Thereby escaping probable arrest and execution he began a new life abroad 1927 1952 which included a research post at the California Institute of Technology in 1929 1930 collaborative projects with the famous physicist P L Kapitsa in Cambridge a long time association with the Institution of Mechanical Engineers in London and work for the British War Office during the Second World War From Marxist revolutionary to American academic this study reveals Lomonosov s extraordinary life Drawing on a wide variety of official Russian sources as well as Lomonosov s own diaries and memoirs a vivid portrait of his life is presented offering a better understanding of how science technology and politics interacted in early twentieth century Russia
