**The Portland Black Panthers** Lucas N. N. Burke,Judson L. Jeffries,2016-01-01 Portland Oregon though widely regarded as a liberal bastion also has struggled historically with ethnic diversity indeed the 2010 census found it to be America s whitest major city In early recognition of such disparate realities a group of African American activists in the 1960s formed a local branch of the Black Panther Party in the city s Albina District to rally their community and be heard by city leaders And as Lucas Burke and Judson Jeffries reveal the Portland branch was quite different from the more famous and infamous Oakland headquarters Instead of parading through the streets wearing black berets and ammunition belts Portland s Panthers were more concerned with opening a health clinic and starting free breakfast programs for neighborhood kids Though the group had been squeezed out of local politics by the early 1980s its legacy lives on through the various activist groups in Portland that are still fighting many of the same battles Combining histories of the city and its African American community with interviews with former Portland Panthers and other key players this long overdue account adds complexity

Exploring Personhood in Contemporary Times Lemuel W. Watson, 2023-03-01 With the dawn of research into leader behaviors scholars differentiated between being task oriented which is important and also being people oriented People matter And we tend to guard against leader attitudes that treat persons as objects as passive or inert as instruments as so much clay to be shaped and molded Hannah Arendt 1958 rejected the idea that leadership is like work in which a craftsman picks up the raw materials and the requisite tools in order to create a product according to an image in his head No she said leadership is social action in which we all participate each with his or her unique and creative spontaneity collaborating in an erratic cascade toward the future Leadership is something people do together And to achieve that vision we must acknowledge each other as persons and not as figures in a ledger or pieces on a chessboard This volume is intended as a call to be curious about what we take for granted as individuals educators and leaders In essence to ask ourselves the more difficult questions about who we are as we recognize our need for others within a community What does it mean to be a person and to recognize another s personhood Nathan Harter 2021 draws us into a space to dialogue with ourselves about the notion of personhood as leaders So what does it mean to be a person And what does it mean to treat someone as a person What does anyone owe another person p 4 In what way then do leaders contend with such questions as they are becoming becoming better leaders becoming better individuals becoming their sacred selves A person centered ethic would be universal in scope yet adapted to local conditions that many leaders must deal with on a daily basis Nearly every religion already addresses both what it means to become a person and what one owes a person ethically regardless of race ethnicity nationality or other affiliation Regardless if organizations deal directly with the notion of personhood leaders deal with the workplace challenges of which the human bring him or her entire self to the unit Hence a comprehensive and integrate context forces us to revisit our assumptions about who exactly is a person and what they might deserve This volume would bring those voices into conversation In addition we intend to complicate the question by extending similar questions into emerging areas of increasing relevance in a technological age that crosses geographic boundaries such as online presences corporate entities and the prospects of Artificial Intelligence If anything an expanded interdisciplinary and global context makes this volume relevant and timely for leaders and leadership studies across multiple fields of study and professions

OECD Trade Policy Studies Liberalisation and Universal Access to Basic Services Telecommunications, Water and Sanitation, Financial Services, and Electricity OECD, The World Bank, 2006-10-26 This volume explores whether and how trade liberalisation can contribute to achieving universal service goals in telecommunications water and sanitation financial services and electricity and the types of complementary policies that may be required The imperial Commonwealth Wm. Matthew Kennedy, 2023-07-25 From the late 1800s to the early 1900s Australian settler colonists mobilised their unique settler experiences to develop their own vision of what empire was and could be Reinterpreting their histories and

attempting to divine their futures with a much heavier concentration on racialized visions of humanity white Australian settlers came to believe that their whiteness as well as their Britishness qualified them for an equal voice in the running of Britain's imperial project Through asserting their case many soon claimed that as newly minted citizens of a progressive and exemplary Australian Commonwealth white settlers such as themselves were actually better suited to the modern task of empire Such a settler political cosmology with empire at its center ultimately led Australians to claim an empire of their own in the Pacific Islands complete with its own unique imperial governmentality

**Frontiers of Knowledge: Scientific and Spiritual**

**Sources for a New Era** Douglas Kinney,2014-06-06 Frontiers of Knowledge is the story of unfolding developments that are revolutionizing our understanding of ourselves and our place in the universe We are birthing a new era in which our ideas about the nature and source of reality are swiftly changing Insights from quantum physics suggest that the basis of our physical world is actually mental conscious thoughts Other discoveries are causing us to redefine our concepts of mind and the elusive thing we call consciousness All strongly hint that spirituality is the underlying source of everything Frontier scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge through systematic investigations of startling phenomena that have been observed in quantum physics cosmology biology psychology disease and healing death near death experiences reincarnation experiences and those occurring in spiritual hypnosis on the nature of the spiritual realm New concepts of reality are especially needed to explain the incredibly finetuned characteristics and the mysterious nature of our physical universe Ninety five percent of the universe's energy and mass are a mystery to

scientists and for the moment we resort to naming them dark matter and dark energy The last time a comparable knowledge revolution occurred was in the late sixteenth century when astronomers determined that the planets revolved around the sun not the earth Historians call it the Copernican Revolution because it led to modern Western science From one perspective the new era predicted in this book a revolution in its own right can be considered the completion of the quantum revolution by defining and explaining the role of consciousness in our universe An underlying aspect of this new revolution is the sense that humanity is moving into a new era of rapidly expanding knowledge of the human spirit our soul aspect and non physical realities Until now this emerging knowledge has not been organized into a coherent and comprehensive structure Frontiers of Knowledge provides the first outline of this new structure of reality

**Data Privacy and Competition Law in the Age of Big Data** Samson Y. Esayas, 2024-06-24 The monetization of personal data has become an increasingly common business practice igniting global debate on the interface between data privacy law and competition law Data Privacy and Competition Law in the Age of Big Data provides a comprehensive novel and interdisciplinary analysis of this nexus Drawing insights from emergent properties and complexity science the book exposes the commonalities and conflicts between how data privacy law and competition law address challenges resulting from the commercialization of personal data Samson Y Esayas begins by identifying key shifts in big data the growing trend of processing personal data for diverse purposes the aggregation of data across various operations and the shift from offering stand alone products and services to ecosystems of several with personal data central in connecting the different markets These shifts engender a complex economic landscape marked by multiple actors a web of interactions and non linear emergent outcomes Despite this complexity the prevailing approach to data privacy law and competition law emphasises isolated units of analysis whether a relevant market or a distinct processing operation This approach overlooks system wide emergent risks borne of cumulative processing operations and cross market practices Additionally a mindset focused on either data privacy law or competition law overlooks the increasing intersection between the two regimes missing opportunities for synergy In light of these challenges Esayas s volume calls for recalibrating data privacy law and competition law for a complex economy emphasizing a holistic systems

level perspective that addresses emergent harms and a polycentric strategy that leverages the strengths of each legal regime

*The Rise and Fall of Social Cohesion* Christian Albrekt Larsen, 2013-06-20 The book explores the ways in which social cohesion measured as trust in unknown fellow citizens can be established and undermined It examines the US and UK where social cohesion declined in the latter part of the twentieth century and Sweden and Denmark where social cohesion increased and aims to put forward a social constructivist explanation for this shift Demonstrating the importance of public perceptions about living in a meritocratic middle class society the book argues that trust declined because the Americans and British came to believe that most other citizens belong to an untrustworthy undeserving and even dangerous bottom of society rather than to the trustworthy middle classes In contrast trust increased amongst Swedes and Danes as they believed that most citizens belong to the middle of society rather than to the bottom Furthermore the Swedes and Danes came to view the perceived narrow bottom of their society as trustworthy deserving and peaceful The book argues that social cohesion is primarily a cognitive phenomenon in contrast to previous research which has emphasized the presence of shared moral norms fair institutions networks engagement in civil society etc The book is based on unique empirical data material where American survey items have been replicated in the British Social Attitude survey and the Danish and Swedish ISSP surveys exclusively for this book It also includes a unique cross national study of media content covering a five year period in UK Sweden and Denmark It demonstrates how the bottom and the middle is differently constructed across countries
