1177 B.C. Eric H. Cline, 2015-09-22 A bold reassessment of what caused the Late Bronze Age collapse In 1177 B C marauding groups known only as the Sea Peoples invaded Egypt The pharaoh's army and navy managed to defeat them but the victory so weakened Egypt that it soon slid into decline as did most of the surrounding civilizations After centuries of brilliance the civilized world of the Bronze Age came to an abrupt and cataclysmic end Kingdoms fell like dominoes over the course of just a few decades No more Minoans or Mycenaeans No more Trojans Hittites or Babylonians The thriving economy and cultures of the late second millennium B C which had stretched from Greece to Egypt and Mesopotamia suddenly ceased to exist along with writing systems technology and monumental architecture But the Sea Peoples alone could not have caused such widespread breakdown How did it happen In this major new account of the causes of this First Dark Ages Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures ranging from invasion and revolt to earthquakes drought and the cutting of international trade routes Bringing to life the vibrant multicultural world of these great civilizations he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries A compelling combination of narrative and the latest scholarship 1177 B C sheds new light on the complex ties that gave rise to and ultimately destroyed the flourishing civilizations of the Late Bronze Age and that set the stage for the emergence of classical Greece

development of networks that would eventually expand to nearly all shores of the Middle Sea Alex R Knodell argues that in order to understand how ancient Greece changed over time one must analyze how Greek societies constituted and reconstituted themselves across multiple scales from the local to the regional to the Mediterranean Knodell employs innovative network and spatial analyses to understand the regional diversity and connectivity that drove the growth of early Greek polities As a groundbreaking study of landscape interaction and sociopolitical change *Societies in Transition in Early Greece* systematically bridges the divide between the Mycenaean period and the Archaic Greek world to shed new light on an often overlooked period of world history

The Collapse of the Mycenaean Economy Sarah C. Murray, 2017-04-24 In this book Sarah Murray provides a comprehensive treatment of textual and archaeological evidence for the long distance trade economy of Greece across 600 years during the transition from the Late Bronze to the Early Iron Age Analyzing the finished objects that sustained this kind of trade she also situates these artifacts within the broader context of the ancient Mediterranean economy including evidence for the import and export of commodities as well as demographic change Murray argues that our current model of exchange during the Late Bronze Age is in need of a thoroughgoing reformulation She demonstrates that the association of imported objects with elite self fashioning is not supported by the evidence from any period in early Greek history Moreover the

notional decline in trade during Greece's purported Dark Age appears to be the result of severe economic contraction rather than a severance of access to trade routes
