

The first of these is the *Apis mellifera*, the common honey bee. It is a very common bee in most parts of the world, and is the one most commonly kept in hives. It is a very social insect, and lives in colonies of thousands of individuals. The queen bee is the only female in the colony that is able to lay eggs. The other females are workers, and their job is to collect nectar and pollen, and to care for the young. The males are drones, and their only job is to mate with the queen. The colony is headed by the queen, and the workers follow her lead. The drones are not needed for the colony to survive, and are often killed by the workers when they are no longer needed.

REPRODUCTION OF BEEHIVES
The reproduction of beehives is a complex process. It involves the queen bee laying eggs, which are then cared for by the workers. The workers also collect nectar and pollen, and they also care for the young. The colony is headed by the queen, and the workers follow her lead. The drones are not needed for the colony to survive, and are often killed by the workers when they are no longer needed.
