*The Application of Foreign Investment Protection in Times of Armed Conflict* Petr Stejskal, 2025-08-25 The monograph presents scenarios of situations where foreign investments suffer damage These model scenarios are based on thorough analysis of real cases facts from the ground and recent arbitral practice relating namely to arbitrations against Russia Syria or Libya This allows the author in the next step to ascertain what rules are applicable to the conduct of states towards foreign investments but also to demonstrate how they apply in real case scenarios In particular the work identifies and applies to these tailored scenarios relevant norms of international investment law international humanitarian law and international human rights law These regimes are relevant for protection of foreign investment but they differ as to the situations they govern parties whose conduct they regulate and obligations they stipulate It is therefore appropriate to analyse in their interconnection how these rules govern typical situations that may arise during armed conflict and what particularly they prescribe On the basis of application of these rules on the defined scenarios the monograph focuses on the issue of applicability of investment treaties in occupied territories and on interactions and on the issue of conflict of norms in situations where foreign investments qualify as military objectives

**The International Criminal Court in Ongoing Intrastate Conflicts** Patrick S. Wegner, 2015-10-09 In recent decades international courts have increasingly started investigating armed conflicts However the impact of this remains under researched Patrick S Wegner closes this gap via a comprehensive analysis of the impact of the International Criminal Court in the Darfur and Lord s Resistance Army conflicts He offers a fresh approach to peace and conflict studies while avoiding the current quantitative focus of the literature and polarisation between critics and supporters of applying justice in conflicts This is the first time that the impact of an international criminal court has been analysed in all its facets in two conflicts The consequences of these investigations are much more complex and difficult to predict than most of the existing literature suggests Recurrent claims such as the deterrent effect of trials and the danger of blocking negotiations by the issuing of arrest warrants are put to the test here with some surprising results

*Entrapment in Escalating Conflicts* J. Brockner,J.Z. Rubin,2012-12-06 It was just over 12 years ago that we first sat down together to talk about psychological traps In the relative calm of late afternoons feet draped casually over the seedy furnishings of the Tufts psychology department we entertained each other with personal anecdotes about old cars times spent lost on hold and the Shakespearean concerns of Rosencrantz and Guildenstern Lord and Lady Macbeth and other notables Eventually informed by our many illustrations and the excitement that their repeated telling engendered in the two of us we began to move more formally into trap analysis How do you know a trap when you see one What are the shared characteristics of all psychological traps regardless of origin scope or complexity What are the key conceptual elements in any effort to differentiate among the traps of the world What factors make us more or less apt to fall prey to entrapment These were some of the questions that arose during these initial meetings A series of weekly meetings stretched over the ensuing years interrupted temporarily by various exigencies and led eventually to a research program that grew to involve a number of students and faculty colleagues At the time of course we did not regard our work as a research program rather even as our experiments proceeded to answer two burning questions at a time they managed to raise three or four new issues that we had not anticipated before

**Rome Convention - Rome I Regulation** Alexander J. Belohlávek,2011-01-01 As of 17 December 2010 the Rome I Regulation EU Regulation 593/2008 on the law applicable to contractual obligations is directly applicable in all EU Member States with the exception of Denmark The Rome I Regulation replaces the Rome Convention of 1980 in the EU Member States and will apply to all contracts concluded as of 17 December 2010 However and herein lies the utility and great importance of this work the Rome Convention and the Rome I Regulation will be applied in parallel for a significant time to come the author himself anticipates a ten to fifteen year period in the latter case to contracts made after 17 December 2010 This is why this commentary takes into account both sources of law in their mutual interaction and broader context The comprehensiveness of the Rome Convention Rome I Regulation is clearly apparent but one of the great achievements of the author is his amassing of over 1 800 judicial decisions most of which are furnished with a detailed commentary where these decisions apply national laws the latter are cited both in the original and in translation For a number of rulings the commentary include not only a case summary of the facts and an analysis of the conclusions drawn by the court but also takes them as models to hypothesize what conclusions would be reached if the Rome I Regulation were to

**Peace?** Lars-Erik Cederman, Simon Hug, Julian Wucherpfennig, 2022-07-07 Does power sharing bring peace Policymakers around the world seem to think so Yet while there are many successful examples of power sharing in multi ethnic states such as Switzerland South Africa and Indonesia other instances show that such arrangements offer no guarantee against violent conflict including Rwanda Yugoslavia Zimbabwe and South Sudan Given this mixed record it is not surprising that scholars disagree as to whether power sharing actually reduces conflict Based on systematic data and innovative methods this book comes to a mostly positive conclusion by focusing on practices rather than merely formal institutions studying power sharing s preventive effect analyzing how power sharing is invoked in anticipation of conflict and by showing that territorial power sharing can be effective if combined with inclusion at the center The authors findings demonstrate that power sharing is usually the best option to reduce and prevent civil conflict in divided states      **Environmental Protection and**

**Transitions from Conflict to Peace** Carsten Stahn, Jennifer S. bodies of law      **The Steps to War** Paul D. Senese, John A. Vasquez, 2008-08-10 The question of what causes war has concerned statesmen since the time of Thucydides The Steps to War utilizes new data on militarized interstate disputes from 1816 to 2001 to identify the factors that increase the probability that a crisis will escalate to war In this book Paul Senese and John Vasquez test one of the major behavioral explanations of war the steps to war by identifying the various factors that put two states at risk for war Focusing on the era of classic international politics from 1816 to 1945 the Cold War and the post Cold War period they look at the roles of territorial disputes alliances rivalry and arms races and show how the likelihood of war increases significantly as these risk factors are combined Senese and Vasquez argue that war is more likely in the presence of these factors because they increase threat perception and put both sides into a security dilemma The Steps to War calls into question certain prevailing realist beliefs like peace through strength demonstrating how threatening to use force and engaging in power politics is more likely to lead to war than to peace      **Current Issues In Global**

the permissibility and effectiveness of targeted killing in campaigns against terror Targeted killing has become a primary counterterrorism measure used by several countries in their confrontation with lethal threats The practice has been extensively used by the US in Afghanistan Iraq Pakistan Yemen and Somalia and by Israel in the West Bank and Gaza Several studies have already explored the difficult balance between achieving security while maintaining the liberties and rights of a country's civilians This book goes a step further by seeking to examine whether maintaining those liberties by complying with legal standards and minimizing unintended deaths can be more effective for national security Using targeted killing applied by Israel in particular as well as the United States during the first decade of the twenty first century as case studies this book explores that question and ultimately assesses whether compliance with legal standards can strengthen a state in its campaign against terrorism and thus provide stronger security The book focuses on civilian related criteria hypothesizing that minimizing civilian casualties will maximize effectiveness in an asymmetric war setting The conclusions are not limited

to a specific tactic or theater and if adopted might have far reaching implications for how asymmetric warfare is strategized This book will be of much interest to students of counter terrorism law Middle Eastern studies and security studies
