has spawned two big screen sequels and three prequels and decades of bestselling fiction. From the original movie tie-in novel through the monumental Fate of the Jedi series, legions of devoted readers have helped expand science fiction's most celebrated film saga into a page-turning print sensation. Now for the first time, a comprehensive overview of these sweeping Star Wars adventures is presented in one beautifully illustrated volume. *Star Wars: The Essential Reader's Companion* spans the entire galaxy of published Star Wars fiction: movie novelizations, original stand-alone and series novels, short stories, eBook novellas, young adult titles, and comics, and features a concise synopsis of each story, including key characters and planets, exclusive behind-the-scenes facts and anecdotes about authors, plot, and character development, continuity notes, and significance in the Star Wars Expanded Universe, details on which novels are linked to Star Wars comic books from Dark Horse and Marvel, a chronological listing of titles spanning the 25,000-year history of the Star Wars universe, and placing each story in its proper context. More than one hundred original paintings throughout by some of fans' favorite artists. Whether skimming through fateful eras from the Old Republic to the New Jedi Order, delving deep into the ancient history of the Lost Tribe of the Sith or the tumultuous Clone Wars, crossing paths and lightsabers with Dark Lords such as Plagueis or Bane, Sidious or Vader helming the Millennium Falcon with Han Solo or mastering the Force with Luke Skywalker, this one-of-a-kind one-stop reference is a must for fans looking to maximize their knowledge of the sprawling Star Wars Expanded Universe.

The Military Science of Star Wars George Beahm, 2018-05-01 George Beahm, a former U.S. Army major, draws on his experience to discuss the military science of the sprawling Star Wars universe: its personnel, weapons, technology, tactics, and strategy, including an analysis of its key battles to explain how the outmanned and outgunned rebels ultimately prevailed against overwhelming forces. Contrasting the military doctrine of the real world with the fictional world of Star Wars, the author constructively criticizes the military strengths and weaknesses of Darth Vader's Galactic Empire and Kylo Ren's First Order. From Star Wars: A New Hope (1977) to *Rogue One* (2016), this timely book demystifies the operational arts in an accessible and entertaining way for military personnel and civilians. Replete with a glossary of military terms, this book is supplemented with an annotated bibliography. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
