Explained Delia Marie Franklin,2013 This book will help readers understand more about gerontological nursing how the different nursing specialties interact and the necessity for multidisciplinary team approaches to improve systems in the

industry The book also highlights some of the many individuals who have contributed to reaching for higher care levels in nursing homes Innovative processes such as the Eden Alternative and the Quality Indicator Survey process are introduced which will assist people to understand the wide range of ways in which the system can be improved As the author emphasizes throughout the book the psychology of kindness is essential and needs to be demonstrated by everyone in the gerontological field from care providers to families and patients Emotions can run high as patients and families may be frightened confused and concerned about making good decisions while the care providers are themselves working hard to provide appropriate care while coping with multiple demands Consideration and humor are in fact most important for creating a positive atmosphere for those in nursing homes
