Women and Mathematics Susan F. Chipman,Lorelei R. Brush,Donna M. Wilson,2014-01-14 First published in 1985 In the mid seventies there was growing concern that early decisions not to study mathematics in high school might be limiting the occupational options available to women As part of a larger program on career development the Career Awareness Division of the Education and Work Group then one of the major organizational units of the National Institute of Education NIE initiated a special research grants program on women and mathematics Research information that would sort out the competing explanations for women s lower rate of participation seemed a useful contribution to debates about possible remedial actions Should there be for example widespread development and implementation of programs designed to reduce mathematics anxiety This volume represents the culmination of a research program with many contributions
