Star Attractions Tamar Jeffers McDonald, Lies Lanckman, 2019-12-15 During Hollywood's classic era from the 1920s to 1950s roughly twenty major fan magazines were offered each month at American newsstands and abroad. These publications famously fed fan obsessions with celebrities such as Mae West and Elvis Presley. Film studies scholars often regard these magazines with suspicion perhaps due to their reputation for purveying scandal and gossip, their frequent mingling of gushing tone and blatant falsehood. Looking at these magazines with fresh, regarding eyes and treating them as primary sources, the contributors of this collection provide unique insights into contemporary assumptions about the relationship between fan and star performer and viewer. In doing so, they reveal the magazines to be a huge and largely untapped resource on a wealth of subjects including gender roles, appearance and behavior, and national identity. Contributors: Emily Chow, Kambitsch, Alissa Clarke, Jonathan Driskell, Lucy Fischer, Ann Marie Fleming, Oana Maria Mazilu, Adrienne L. McLean, Sarah Polley, Genevieve Sellier, Michael Williams.

The Medieval Chronicle VII. Juliana Dresvina, Nicholas Sparks, 2011-04 There are several reasons why the chronicle is particularly suited as the topic of a yearbook. In the first place, there is its ubiquity all over Europe and throughout the Middle Ages; chronicles were written both in Latin and in the vernacular, and not only in Europe but also in the countries neighbouring on it like those of the Arabic world. Secondly, all chronicles raise such questions as by whom, for whom, or for what purpose were they written, how do they reconstruct the past, what determined the choice of verse or prose, or what kind of literary influences are discernable in them. Finally, many chronicles have been beautifully illuminated, and the relation between text and image leads to a wholly different set of questions. The yearbook *The Medieval Chronicle* aims to provide a representative survey of the on-going research in the field of chronicle studies, illustrated by examples from specific chronicles from a wide variety of countries, periods, and cultural backgrounds. The *Medieval Chronicle* is published in cooperation with the Medieval Chronicle Society.

Silent to Sound Geoff Brown, 2024-10-22 Silent cinema was never silent. But from the mid 1920s onwards, the sound part of the cinema experience was transformed by the arrival of films long and short with clearly audible talk, music, and sound effects built in. It marked the most fundamental shift in cinema technology since cinema's birth. The first book devoted to Britain's conversion to talkies and the result of eight years' research, *Silent to Sound: British Cinema in Transition* takes a lively and comprehensive look at the production side of the British sound revolution, stretching from experimental efforts in the late 19th century through the sound shorts of the 1920s to the key year of 1929, the year of Hitchcock's *Blackmail*, Britain's first home-grown talkie feature, and the industry turmoil that followed. The narrative concludes in 1934 when John Grierson's GPO Film Unit finally acquired sound equipment, prompting a late burst of experimentation just when commercial feature soundtracks had settled down. Films familiar, neglected, and unknown are examined: overripe melodramas, the lost *Black Waters*, local versions of Hollywood musicals, *Harmony Heaven*, visually elaborate science fiction, *High Treason*, plus newsreels, documentaries,

amateur films and the last phase of British silent production The impact of sound on studio technique is examined along with the industry's complex relations with Britain's strong theatre traditions with Europe and above all cinema's superpower America It's also never forgotten that the sound transition was shaped not just by technology but by the talents foibles and follies of individual people Film history with a human face **Tasting Beer, 2nd Edition** Randy Mosher, 2017-04-04 This completely updated second edition of the best selling beer resource features the most current information on beer styles flavor profiles sensory evaluation guidelines craft beer trends food and beer pairings and draft beer systems You'll learn to identify the scents colors flavors mouth feel and vocabulary of the major beer styles including ales lagers weissbeers and Belgian beers and develop a more nuanced understanding of your favorite brews with in depth sections on recent developments in the science of taste Spirited drinkers will also enjoy the new section on beer cocktails that round out this comprehensive volume **The Ancient World in Silent Cinema** Pantelis Michelakis, Maria Wyke, 2013-08-15 The first systematic attempt to focus on the instrumental role of silent cinema in early twentieth century conceptualizations of the ancient Mediterranean and Middle East It is located at the intersection of film studies classics Bible studies and cultural studies *The Nation*, 1925 [Ghost Gum Valley](#) Johanna Nicholls, 2012-07-01 Ghost Gum Valley is the second book from Australian author Johanna Nicholls This sweeping saga is set in the early days of the Colony of New South Wales and follows the adventures of Isabel de Rolland an English aristocrat descended from the Plantagenets as she is sent out to the penal colony to marry Marmaduke Gamble in a deal organised by their elders The debts of Isabel's family are paid in exchange for the respectability that her lineage gives the rich ex convict Gamble family From the inauspicious beginnings of their arranged marriage Isabel and Marmaduke develop a grudging friendship that looks to bloom into something more But the secrets of the past are destined to haunt them and the madness and darkness of their families threaten to overwhelm them This wonderful new story has something for everyone a bygone era brought to life the importance of being free of the past to embrace the future and above all a wonderful love story between two of fiction's most delightful characters **Hong Kong** Gene Gleason, 2021-11-05 In Hong Kong Gene Gleason expertly weaves a narrative that explores the complex interplay of cultural identity colonial legacy and modernity in one of Asia's most dynamic cities Through vivid prose and rich imagery the author captures the essence of Hong Kong's bustling streets its multifaceted history and the existential dilemmas faced by its inhabitants Gleason's lyrical style and keen observational skills immerse readers in the frenetic pace of urban life while also prompting reflections on broader themes of globalization and national identity situating this work within a global literary context where East meets West Gene Gleason a distinguished scholar and writer with extensive experience in Asian studies draws upon his personal experiences living in Hong Kong amid the city's rapid transformation His academic background and deep appreciation for the region's cultural tapestry profoundly inform his narrative approach This book reflects his commitment to fostering greater understanding of Hong Kong's unique position within world affairs emphasizing both

relationship with a larger than life figure and cast their various light on his by no means unproblematic legacy Doug Pratt's DVD Douglas Pratt,2004-10 The ultimate guide to DVD by the world s leadding authority on the medium The Lever of Riches Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential Form ,1913 **The Rough Guide to Paris** Ruth Blackmore,James McConnachie,2008-01-10 The Rough Guide to Paris provides accounts of the classic must see sites like the Arc de Triomphe and the Louvre as well as delving deeper and allowing you to discover the less clich d and commercial side of the city such as the atmospheric streets of the Marais Packed with practical perceptive reviews and hand picked listings of bars restaurants accommodation and more the authors recommendations and expert local knowledge will inspire you to experience the best places to eat stay and party whatever your budget The guide provides all the info needed to explore every corner of Paris with individually themed detailed sections from how to keep the kids entertained to making the most of the gay and lesbian side of Paris Covering daytrips from the city there are sections on Disneyland Paris the famous historical city of Versailles beautiful Monet s Garden at Giverny and more

Make the most of your time with *The Rough Guide to Paris* *Painting the Cannon's Roar* Thomas Tolley, 2017-07-05 From c 1750 to c 1810 the paths of music history and the history of painting converged with lasting consequences The publication of Newton's *Opticks* at the start of the eighteenth century gave a scientific basis to the analogy between sight and sound allowing music and the visual arts to be defined more closely in relation to one another This was also a period which witnessed the emergence of a larger and increasingly receptive audience for both music and the visual arts an audience which potentially included all social strata The development of this growing public and the commercial potential that it signified meant that for the first time it became possible for a contemporary artist to enjoy an international reputation Nowhere is this better illustrated than in the career of Joseph Haydn Although this phenomenon defies conventional modes of study the book shows how musical pictorialism became a major creative force in popular culture Haydn the most popular living cultural personality of the period proved to be the key figure in advancing the new relationship The connections between the composer and his audiences and leading contemporary artists including Tiepolo Mengs Kauffman Goya David Messerschmidt Louthembourg Canova Copley Fuseli Reynolds Gillray and West are examined here for the first time By the early nineteenth century populism was beginning to be regarded with scepticism and disdain Mozart was the modern Raphael Beethoven the modern Michelangelo Haydn however had no clear parallel in the accepted canon of Renaissance art Yet his recognition that ordinary people had a desire to experience simultaneous aural and visual stimulation was not altogether lost finding future exponents in Wagner and later still in the cinematic arts
