Dreams in American Television Narratives Cynthia Burkhead, 2013-05-23

Dreams in Television Narratives is the first comprehensive analysis of one of American television's most frequently utilized tropes: the dream. From its beginning, television has been a storytelling medium. Whether delivered to a live audience or played out on a sound stage, narratives and those who write them have always been the crux of the television program. While film can claim a long history of scholarly inquiry into the connection between film and dreams, no comprehensive research exists on the subject of television dreams. Locating its primary function as narrative, the author uses examples from American sitcoms and dramatic programs, analyzing the narrative functions of dreams using as its frame Carl Jung's narrative stages of the dream: exposition, development, culmination, and conclusion. While television dreams are analyzed throughout, case studies of the television programs *The Sopranos* and *Buffy the Vampire Slayer* are included to show in detail how dreams function throughout a television series. Includes a compendium of over 1000 television episodes that include dreams, a valuable tool for any television scholar or enthusiast.

In *The Simpsons*, Hans Moleman has died at least 15 times. The Sex Is Out of This World Sherry Ginn, Michael G. Cornelius, Donald E. Palumbo, 2012-11-08 Science fiction can be translated into real unreality. More than a genre like fantasy, which creates entirely new realms of possibility, science fiction constructs its possibilities from what is real, from what is indeed possible or conceivably so. This collection then looks to understand and explore the unreal reality to note ways in which our culture's continually changing and evolving mores of sex and sexuality are reflected in, dissected by, and deconstructed through the genre of science fiction. This book is a collection of new essays with the general objective of filling a gap in the literature about sex and science fiction, although some work has gone before. None of it is recent. The essays herein explore the myriad ways in which authors, regardless of format (print, film, television, etc.) envision very different beings expressing this most fundamental of human behaviors.
