Examination of a fundamental human right : the 2006 International Religious Freedom Report : hearing , **Dynamics of Human Rights in the US Foreign Policy** Sanjay Gupta, 1998 The book revolves around the role of the US federal government in the protection and promotion of human rights at the global level A comparative analysis of human rights policy of different US Presidencies toward various regions of the world is analysed The book discusses the broad theoretical perspectives on human rights and goes on to trace the growth and development of human rights in the US foreign policy from the time of American Declaration of Independence of 1776 In particular it assesses the role of Jimmy Carter and Ronald Reagan in addressing the global human rights issues Besides the US policy toward the former Soviet Union China and Latin America has also been elaborately examined The US Declaration of Independence of 1776 together with the Bill of Rights of 1791 constitutes the bedrock of US commitment and dedication to human rights The great American statesmen Jefferson Lincoln Roosevelt and Carter rendered yeomen service to the cause of human rights both at home and the world at large However in practice the concern for human rights during the successive US administrations has not been consistent as there were occasions when the US gave greater weightage to strategic military relations and economic considerations than to human rights Besides there were instances when the US became a passive collaborator to human rights abuses committed by several of its allies particularly in Latin America and Asia Also there were certain Presidencies as Nixon and Reagan that gave more rhetorical speeches and statements on human rights with little follow up action On the whole the US human rights policy has been active assertive and dynamic and its application been region and situation specific United States Support of Human Rights and Democracy United States. and to make them essentially unobservable Finally what challenges might scholars encounter in the future as the conceptualization of human rights develops and changes and as new methods and technologies e g natural language processing machine learning are introduced into the study of human rights This book will be of interest to students and scholars of human rights politics power development and governance The chapters in this book were originally published as a special issue of Journal of Human Rights *Country Reports on Human Rights Practices for 1999* United States. Television News and Human Rights in the US & UK Shawna M. Brandle,2015-12-22 Does the CNN Effect exist Political communications scholars have debated the influence of television news coverage on international affairs since television news began especially in relation to the coverage of massive human rights violations These debates have only intensified in the last 20 years as new technologies have changed the nature of news and the news cycle But despite frequent assertion little research into the CNN Effect or whether television coverage of human rights violations causes state action exists Bridging across the disciplines of human right studies comparative politics and communication studies in a way that has not been done this book looks at television news coverage of human rights in the US and UK to answer the question of whether the CNN Effect actually exists Examining the human rights content in television news in the US and UK yields insights to what television news producers and policy makers consider to be human rights and what if anything audiences can learn about human rights from watching television news After reviewing 20 years of footage using three different types of content analyses of American television news broadcasts and two different types of British news broadcasts and comparing those results with human rights rankings and print news coverage of human rights Shawns M Brandle concludes that despite rhetoric from both countries in support of human rights there is not enough coverage of human rights in either country to argue that television media can spur state action on human rights issues More simply the violations will not be televised A welcome and timely book presenting an important examination of human rights coverage on television news *State, Foreign Operations, and Related Programs Appropriations for 2015* United States.
