## Analysis

1. During 1906 and 1907, what two methods did the Forest Service use to protect the Kaibab deer?

Theodore Roosevelt created a national game reserve and they exterminated the predators of the Kaibab deer.

1. Why did you expect the population of the deer to grow in 1906 and 1907?

Because the reserve was created and the predators were exterminated.

1. Why did you expect the population of deer to decline in 1925, although the extermination of predators occurred?

The deer population was over 100,000 and the reserve was over 100,000 acres. The population was too large for the reserve.

1. Why did you think the deer population was in 1925 was 100,000 when the extermination of predators had occurred in 1906?

Because the population was too large for the reserve and the reserve was too small for the population.

1. Why did the deer population decline after 1925?

The population was too large. The population was growing too fast and the reserve was too small.
