Portfolio for the Planet

Tammy Newmark,Michele Pena,2013-07-03 Rapid growth of the global economy has accelerated the degradation of the Earth s most important asset the environment Increasing poverty and challenges arising from climate change further threaten the planet s natural systems With a rising global population the demand on natural resources to cover even basic human needs is intensifying supporting businesses that promote the sustainable use of natural resources and help ensure their long term viability is imperative As part of a pioneering movement to harness business towards effecting environmental change The

Nature Conservancy launched EcoEnterprises Fund in 2000 to provide investment capital to grow small eco businesses in Latin America. There is a compelling need for financing this niche. Companies of this size truly drive change, creating the engine for economic activity and generating livelihoods for bottom of the pyramid rural peoples, which brings about positive social and conservation impacts. EcoEnterprises Fund's portfolio highlights twenty three cutting edge companies in expanding sectors such as organic agriculture, ecotourism, sustainable forestry and non timber forest products, which include innovative industry first movers from organic shrimp to biodynamic flowers and ready to drink smoothies made from the latest Amazonian berry. With a successful ten year track record, EcoEnterprises Fund has valuable learning to share from what pitfalls to avoid when structuring investments to what types of assistance entrepreneurs in these emerging environmental sectors need most. Portfolio for the Planet translates a decade of experience into accessible lessons for both veterans and newcomers in the field for those interested in investing in sustainable businesses, discovering novel approaches to environmental conservation or seeing entrepreneurs pursue their dreams.

Virtual Economies Vili Lehdonvirta, Edward Castronova, 2014-05-09. How the basic concepts of economics including markets, institutions and money can be used to create and analyze economies based on virtual goods. In the twenty first century digital world, virtual goods are sold for real money. Digital game players happily pay for avatars, power ups and other game items. But behind every virtual sale, there is a virtual economy, simple or complex. In this book, Vili Lehdonvirta and Edward Castronova introduce the basic concepts of economics into the game developer's and game designer's toolkits. Lehdonvirta and Castronova explain how the fundamentals of economics, markets, institutions and money can be used to create or analyze economies based on artificially scarce virtual goods. They focus on virtual economies in digital games but also touch on serious digital currencies such as Bitcoin as well as virtual economies that emerge in social media around points, likes and followers. The theoretical emphasis is on elementary microeconomic theory with some discussion of behavioral economics, macroeconomics, sociology of consumption and other social science theories relevant to economic behavior. Topics include the rational choice model of economic decision making, information goods versus virtual goods, supply, demand and market equilibrium, monopoly power, setting prices and externalities. The book will enable developers and designers to create and maintain successful virtual economies, introduce social scientists and policy makers to the power of virtual economies and provide a useful guide to economic fundamentals for students in other disciplines.
