Sa nouvelle version simplifie sa prise en main tout en offrant une gamme de possibilités très tendue du simple blog à la boutique en ligne. Avec le module Virtuemart Joomla permet à n'importe qui de pouvoir créer une boutique en ligne complète et très rapidement. Virtuemart est aussi une des extensions e-commerce les plus répandues aujourd'hui. Vous n'aurez plus de raison de ne pas avoir vous aussi votre site professionnel sur Internet. *JEmbedAll manual* Dan-Marius Sabau, 2017-01-29 JEmbedAll is a Joomla component and plugin that you can purchase from <http://www.goldengravel.eu> something you can add to your website and start embedding videos, images and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin but it also offers support for downloading files and generating ebooks. The package is easy to configure and to work with. Some features have to be configured; there is a configuration section just for that in the backend in order to be embedded and used properly in the frontend; other features are integrated and you just use them as they are. Even so, you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version then install it in order to have a powerful tool to embed videos from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others, documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos, Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version, you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online; upload your videos on YouTube or Vimeo for example and upload your files; the documents can be Portable Document Format (PDFs), Word docs, Power Point, Spreadsheets and any other documents recognized by Google Docs on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com but that works fine; it works as well if they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images, sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages; they can contain any number of files the visitors can download for free or for money. Paypal payment included. You can define, configure and embed Community Builder advanced searches; this component works with any CB version. Since JEmbedAll version 1.3 the search results can open in the same window, in a different window or in a modal window. Beyond that, you can give every user several powerful tools; they can save the search

forms and search results they can embed that saved search results as users lists they can use CB privacy a tool that restricts access to some fields or even the users on searches You can embed Facebook pages posts videos and images depending on the Facebook privacy in many cases all this have to be public for everyone to see but you can also embed some plugins Facebook activity comments facepile likebox and recommendations Starting with the 1.5 version you can generate and download e books based on your website content The Paypal payment was modified and extended you can create shopping carts for files you want sell and the generated e books

Crear una web desde cero. Paso a paso con Joomla!. 2ª Edición Actualizada Fernando Rodríguez Diéguez, 2016-01-01 Joomla es el Gestor de Contenidos líder del mercado y le permite crear sitios web de forma sencilla sin programación y gratuitamente. Siguiendo su panel de control gráfico podrá añadir y organizar artículos de contenido como un periódico online pero además con sus extensiones llevar su sitio web mucho más allá incorporando la funcionalidad que necesite: un foro, una tienda virtual, encuestas, etc. todo bajo una apariencia gráfica atractiva que usted definirá con diferentes menús de acceso, animaciones, videos o galerías de imágenes. En este libro se explicará cómo crear un sitio web completo con Joomla sin necesidad de conocimientos técnicos previos desde cero, paso a paso y con capturas de pantalla de cada una de las tareas a realizar desde la instalación inicial hasta los últimos ajustes finales. Es por tanto un manual ideal para el autoaprendizaje. El manual se basará en la construcción del sitio web de una clínica veterinaria con noticias e información relevante. Una tienda virtual con los productos a la venta, una agenda en la que los clientes pedirán citas para consulta, un foro de dudas y comentarios, formularios de contacto, etc. Le asignaremos un aspecto acorde al negocio y definiremos distintos niveles de permisos para que haya información pública y a la vez otra a la que solo puedan acceder ciertos usuarios. Podrá aplicar esta guía de desarrollo para cualquier tipo de web de cualquier sector ya que la metodología es la misma independientemente de la temática del sitio.
