

A Visual Guide to Quotations

direct quote

THE EXACT WORDS OF THE SOURCE ARE TAKEN FROM THE SOURCE AND PUT INTO QUOTATION MARKS.

Direct quotes use the author's exact words for evidence.

paraphrase

REPHRASES IDEAS FROM THE TEXT AS PUT INTO YOUR OWN WORDS.

However, it is always better to paraphrase because most of the paper will be in your own words.

example quotes

Kathy Kulp, author of *The Harvest Diet*, writes "People should eat seaweed because this delicious plant is full of vitamins, minerals, and antioxidants" (Kulp 17).

According to Kulp, seaweed can be added to salad as a quick and easy way to get more Vitamin K (20).

Chase Oryson, writing for the website *marinemedicine.com*, adds that there is "an endless supply of seaweed" in the oceans that can be inexpensively harvested (Oryson).

Add the author and source so it can be fully cited.

Once you use the author's full name, you can just use the author's last name.

Put quotation marks around direct quotes.

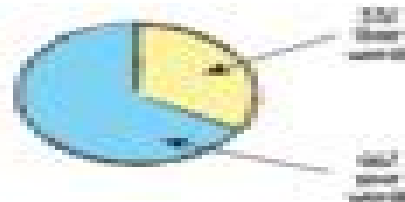

When you use a direct quote, it should stand on a complete sentence.

How much should I quote?

About 25% of your paper should be your own words and ideas. If you have more than that, you aren't using enough evidence. If you use less than that you aren't explaining the reasoning behind your evidence.

Other things you can do to direct quotes to improve clarity

[brackets]	indicates a word that isn't in the original text
ellipsis	shows where words have been removed
asterisk	indicates words or phrases

This edited volume is a timely opportunity to capture previously undocumented learning generated from a wide range of innovative participatory initiatives implemented in Ireland. In capturing this learning, real world guidance will be provided to international policy makers, practitioners and researchers working with children and youth. This book is essential reading for those interested in a rights based participatory approach for those who want to appropriately and meaningfully engage children and youth in research and for those wishing to maximise the contribution of children and youth in policy making.

Visual Writing Alex Baratta, 2010-07-12 Considering the fact that the academic essay continues to be widely used as an assessment tool within education, there is a need for students to develop their skills in this area. However, it is often the case that students perceive instruction in academic writing, if it is offered at all, as boring. This book addresses these two issues. First, the book can be used by students themselves, even in the absence of academic writing classes, as a self-help guide from which they can develop their knowledge of academic writing and subsequent proficiency. Second, by discussing the components of academic writing in terms such as film, which are familiar to today's generation, students are enabled to relate to the material better and see what might have been perceived as dull from a brand new perspective. Visual learners in particular will enjoy the analogous link between films and essays, and students today are arguably more visually literate than previous generations, being exposed to visuals on a daily basis through text message iconography, computer games and the Internet. The visual instruction provided in turn helps to facilitate mental visuals in students' minds from which their knowledge of essay writing can start to develop. *Children's Learning in a Digital World* Teena Willoughby, Eileen Wood, 2008-04-30 *Children's Learning in a Digital World* presents exciting and challenging new ideas from international scholars on the impact of computers, the Internet and video games on children's learning. Features exciting new research which reassesses the threats posed by technology to the social, emotional and physical development of children. Examines the impact of technology in both formal and informal learning contexts, covering a range of technologies relevant to students and researchers as well as professional educators. Presents key information on the social and cultural issues that affect technology use, in addition to the impact on children's learning. Includes research from an international range of contributors.
