✓ Exclusively available on IvyPanda

The publication "Low Vitamin D Linked to Increased Risk of Premature Death" by Corrie Pelc and published by Medical News Today on October 25, 2022, is targeted at educating the general health consumer. Audience targeted by the article is the general public on how to adopt healthy lifestyle habits. The overall purpose of the report is to define Vitamin D, highlight sources of Vitamin D, and explore the relationship between Vitamin D deficiency and premature mortality. The material is published on the Medical News Today [web page](#).

The Centre for Disease Control (CDC) outlines seven categories of clear communication index and evidence-based criteria for evaluating public communication materials. Categories of clear communication index, including the Main Message and Call to Action, Language, Information Design, State of the Science, Behavioral Recommendations, Numbers, and Risks, will evaluate the general consumer publication. Although the publication contains the main message, partly reading "About 1 billion people globally have a vitamin D deficiency," and placed in the first section with visual clues of boldface, it does not contain a precise Call of Action (Pelc, 2022). Moreover, the language of the main message is expressed in passive voice and is hence inaccurate. While some information is designed in bulleted lists, most content is organized in small paragraphs with sub-headings. The source of the subject matter is acknowledged with an authoritative primary source. Two behavioral recommendations for appropriate sun exposure and seeking medication are at the end of the article. Moreover, the material emphasizes the numbers and risks relevant to the primary message.

Overall, the strengths of the publication are the language, information design, state of science, behavioral recommendations, numbers, and risks categories. However, I would prescribe incorporating a Call to Action and hierarchical organization of the main message. Additionally, an active rather than passive voice in the main message and call to action would render the article more potent.

Natural Causes Dan Hurley, 2007-12-26 A riveting work of investigative journalism that charts the rise of the dietary supplement craze and reveals the dangerous and sometimes deadly side of these highly popular and completely unregulated products Over 60 percent of Americans buy and take herbal and dietary supplements for all sorts of reasons to prevent illness vitamin C to ease depression St John's wort to aid weight loss ephedra to boost the memory ginkgo

biloba and even to cure cancer shark cartilage bloodroot despite the fact that few of these natural supplements have been proven to be safe or effective The vitamin and herbal supplement industry generates over 20 billion a year by selling products that promise to cure or fix but are produced and marketed essentially without oversight And while the media has been quick to sensationalize the benefits of supplements few have taken a hard look at the dangers posed by many of the remedies flooding the market today Award winning journalist Dan Hurley breaks the silence for the first time in *Natural Causes* From the snake oil salesmen of the early twentieth century to rise of the health food movement in the sixties and seventies Hurley charts the remarkable growth of an industry built largely on fraud and reveals the backroom politics that led to the passage of the Dietary Supplement Health and Education Act of 1994 which effectively freed the industry from FDA oversight In unprecedented detail he shows how supplement manufacturers have concealed the truth about dozens of untested treatments and the shocking rise in deaths disfigurements and life threatening injuries caused by products deceptively promoted as safe and natural Most importantly he provides a telling look at why in an age of unprecedented scientific advancement we continue to buy and believe in remedies for which little evidence exists and why the supplements we take to promote our health may be doing far more harm than good As Hurley shows the dietary supplement craze may be one of the greatest swindles ever perpetrated on the American public one that feeds billions of dollars each year into the pockets of lobbyists politicians and any charlatan who wants to slap a label on a bottle and tout it as the next big natural cure Blending hard facts with spellbinding personal stories *Natural Causes* is a must read for anyone who has ever popped a multivitamin or an herb and provides a hard hitting frightening look at a cultural trend that is out of control
