genre as well as the identity which it represents and by which audience and performers are linked Country music can be regarded as the music of Southern working class Americans Since before the Civil War the South has always been looked down upon as being primitive simple minded and extremely religious Having its roots in the South country music has had to face substantial criticism in terms of unsophistication and over sentimentalization Due to a shift in national economic power the United States have become increasingly Southernized both culturally and musically Southern culture and identity have become desirable This phenomenon allowed country music to shed its dubious reputation and gain popularity across the country This paper will shine a light on the American South as a cultural region that has more to offer than what meets the eye Southern working class culture and its core values are going to be described and put in context with country music as a form of cultural expression Central themes in American country music are family love heartbreak work friends religion and patriotism Characteristic for the country music genre are its narrative structures which by telling a story enhance its ability to form a collective identity as well as a connection between the narrator the performer and the audience However country musicians are not solely messengers of the
