Diane Klein, 1996 This comprehensive book takes a non-categorical approach to preparing future early childhood teachers to help infants and young children with disabilities meet their challenges and develop to their fullest potential The result is a versatile and compelling resource of field experience Coverage is organized around four themes how all young children learn children in the context of their family traditional developmental domains and the need to take a synthesized view of the whole child Dozens of developmentally appropriate activity-based strategies for adapting curriculum to suit both children and their families are provided in every chapter For future early childhood education teachers who will work with exceptional children and need to focus on special needs rather than special labels

**Adapting Early Childhood Curricula for Children with Special Needs** Ruth E. Cook, Annette Tessier, Virginia B. Armbruster, 1987 His comprehensive practical book is built on solid theory and evidence-based practices from both the fields of Special Education and Early Childhood Education When the first edition was conceived in 1980 the authors encountered students who either had a strong special education background or a strong early childhood child development background Each group had a lot to learn from the other and a lot to contribute to the other The original purpose was to bring together the best from both fields into Early Childhood Special Education The book continues to take a practical activity-based approach that is theoretically sound and current It also provides ample detail related to specific intervention strategies that enhance the effective use of embedded learning opportunities within daily curriculum activities and routines Its relatively jargon-free readable approach that is built on evidence-based practices make it appropriate for a wide range of readers The illustrations of techniques and strategies throughout make it sustainable as a
