capital consolidating power and profit within existing systems of gendered and raced socioeconomic stratification Taking a radical feminist heterodox qualitative and intersectional approach this book investigates the political economy of same sex marriage across three axes same sex marriage as institution same sex marriage and the market and the political economy of the rainbow family The examination of case studies from different countries and regions enables a comparative analysis that foregrounds cultural political and economic path dependencies while at the same time highlighting a number of striking commonalities In all the countries discussed in this book and in most respects same sex marriage has been integrated almost seamlessly into a mainstream malestream political economy of marriage and family and its translation into added market and productive value The Political Economy of Same Sex Marriage A Feminist Critique will be of use to researchers and students alike and indeed to all those who are curious about the mainstreaming of homosexuality within twenty first century capitalist democracies
