J. Rasmus Brandt, Erika Hagelberg, Gro Bjørnstad, Sven Ahrens, 2016-12-31 Life and Death in Asia Minor combines contributions in both archaeology and bioarchaeology in Asia Minor in the period ca 200 BC-AD 1300 for the first time The archaeology topics are wide ranging including death and territory death and landscape perception death and urban transformations from pagan to Christian topography changing tomb typologies funerary costs family organization funerary rights rituals and practices among pagans Jews and Christians inhumation and Early Byzantine cremations and use and reuse of tombs The bioarchaeology chapters use DNA isotope and osteological analyses to discuss both among children and adults questions such as demography and death rates pathology and nutrition body actions genetics osteobiography and mobility patterns and diet The areas covered in Asia Minor include the sites of Hierapolis Laodikeia Aphrodisias Tlos Ephesos Priene Kyme Pergamon Amorion Gordion Boazkale and Arslantepe The theoretical and methodological approaches used make it highly relevant for people working in other geographical areas and time periods Many of the articles could be used as case studies in teaching at schools and universities An important objective of the publication has been to see how the different types of results emerging from archaeological and natural science studies respectively could be integrated with each other and pose new questions on ancient societies which were far more complex than historical and social studies of the past often manage to transmit

The Routledge Handbook of the Byzantine City Nikolas Bakirtzis, Luca Zavagno, 2024-01-31 The Byzantine world contained many

important cities throughout its empire Although it was not urban in the sense of the word today its cities played a far more fundamental role than those of its European neighbors This book through a collection of twenty four chapters discusses aspects of and different approaches to Byzantine urbanism from the early to late Byzantine periods It provides both a chronological and thematic perspective to the study of Byzantine cities bringing together literary documentary and archival sources with archaeological results material culture art and architecture resulting in a rich synthesis of the variety of regional and sub regional transformations of Byzantine urban landscapes Organized into four sections this book covers Theory and Historiography Geography and Economy Architecture and the Built Environment and Daily Life and Material Culture It includes more specialized accounts that address the centripetal role of Constantinople and its broader influence across the empire Such new perspectives help to challenge the historiographical balance between margins and metropolis and also to include geographical areas often regarded as peripheral like the coastal urban centers of the Byzantine Mediterranean as well as cities on islands such as Crete Cyprus and Sicily which have more recently yielded well excavated and stratigraphically sound urban sites The Routledge Handbook of the Byzantine City provides both an overview and detailed study of the Byzantine city to specialist scholars students and enthusiasts alike and therefore will appeal to all those interested in Byzantine urbanism and society as well as those studying medieval society in general

Archaeology and Urban Settlement in Late Roman and Byzantine Anatolia John Haldon, Hugh Elton, James Newhard, 2018-11-22 The site of medieval Euchaita on the northern edge of the central Anatolian plateau was the centre of the cult of St Theodore Tiro the Recruit Unlike most excavated or surveyed urban centres of the Byzantine period Euchaita was never a major metropolis cultural centre or extensive urban site although it had a military function from the seventh to ninth centuries Its significance lies precisely in the fact that as a small provincial town something of a backwater it was probably more typical of the average provincial Anatolian urban settlement yet almost nothing is known about such sites This volume represents the results of a collaborative project that integrates archaeological survey work with other disciplines in a unified approach to the region both to enhance understanding of the history of Byzantine provincial society and to illustrate the application of innovative approaches to field survey

The Archaeology of Byzantine Anatolia Philipp Niewohner, 2017-03-17 The volume propounds a new understanding of the hitherto enigmatic medievalization of the Roman empire provides English presentations of foreign language research and promises to serve as an essential compendium that may help to establish Anatolian archaeology more widely in academic curricula worldwide

Dey, 2014-11-17 This book offers a new and surprising perspective on the evolution of cities across the Roman Empire in late antiquity and the early Middle Ages third to ninth centuries AD It suggests that the tenacious persistence of leading cities across most of the Roman world is due far more than previously thought to the persistent inclination of kings emperors caliphs bishops and their leading subordinates to manifest the glory of their offices on an urban stage before crowds of city dwellers Long after the dissolution of the Roman Empire in the fifth century these communal leaders continued to maintain and embellish monumental architectural corridors established in late antiquity the narrow but grandiose urban itineraries essentially processional ways in which their parades and solemn public appearances consistently unfolded Hendrik W Dey s approach selectively integrates urban topography with the actors who unceasingly strove to animate it for many centuries **The Paulicians** Carl Dixon, 2022-05-16 Disavowing their traditional portrayal as the progenitors of medieval Christian dualism this book recasts the Paulicians as broadly conventional Christians inspired by the apostle Paul Using previously neglected Paulician testimony and a critical reappraisal of the existing sources it explains their fleeting regional prominence via a pluralistic approach to Paulician identity within the complex socio religious milieus of Armenia and Asia Minor Exploring their history of schism persecution and resistance it reassesses their relationship with the iconoclast controversy and the changing fortunes of Byzantine Islamic warfare shedding new light on their obscure but fascinating transformation from itinerant preachers to militarized

insurrectionists **Medieval Europe From Another Angle** Florin Curta, 2025-05-29 The history of East Central Southeastern and Eastern Europe may be considered as alternating between a Marxist emphasis on rigid differences between Antiquity and the Middle Ages largely derived from distinctive modes of production and a preoccupation with borders ethnicity and personalities This volume examines a number of economic problems that highlight the limits of the current interpretative models such as the existence of markets or the relation between trade and gift giving largely on the basis of the archaeological evidence from the eastern parts of the European continent In addition four other chapters address critically such issues as the images of Charlemagne in East Central Europe and of the Vlachs in the French crusade chronicles linear frontiers as well as the significance of St Christopher in Teutonic Prussia Medieval Europe from Another Angle will appeal to scholars and students alike studying Late Antiquity and the early Middle Ages with an interest in material culture and its use in building ethnic boundaries It covers a wide geographical area from Iberia to the Baltic region
