[Visions of Mars](#) Howard V. Hendrix, George Slusser, Eric S. Rabkin, 2014-01-10 Seventeen wide-ranging essays explore the evolving scientific understanding of Mars and the relationship between that understanding and the role of Mars in literature, the arts, and popular culture. Essays in the first section examine different approaches to Mars by scientists and writers: Jules Verne and J. H. Rosny. Section Two covers the uses of Mars in early Bolshevik literature: Wells, Brackett, Burroughs, Bradbury, Heinlein, Dick, and Robinson, among others. The third section looks at Mars as a cultural mirror in science fiction. Essayists include prominent writers, e.g., Kim Stanley Robinson, scientists, and literary critics from many nations.

The Craft of Scientific Films Lauren Murphy,Michael Alley,2023-08-31 This book the first of its kind helps scientists and engineers of all stages and disciplines share their work in a new way with movies Today much of scientific communication is embedded in papers and presentations but these

documents don't often extend outside of a specific academic field. By adding movies as a medium of communication, scientists and engineers can better communicate with their colleagues while also increasing their reach to students, professors, peers, potential collaborators, and the public. Scientific films help translate complex technical topics into more accessible and consumable messages. By following Lauren Murphy's filmmaking formula (planning, shooting, and editing), readers will create their very own scientific films that look professional and polished. Using tools as simple as a smartphone, readers can develop short personal stories with no cost or experience needed. This book will guide readers through all steps of the movie-making process to a finished product. Readers will evolve their creative thinking skills and use their movies to improve classroom presentations, network across student organizations, present at conferences, recruit students for their labs, secure grant money, and more. Adding a movie to your body of work can be the tool that sparks interest in audiences, to learn more, driving traffic to your publications, research projects, and websites. This book will help you develop new skills to become a better communicator while spreading your ideas and research to new audiences.

Identity, Culture, and the Science

Performance, Volume 1 Vivian Appler, Meredith Conti, 2022-08-11. *Identity, Culture, and the Science: Performance Volume 1: From the Lab to the Streets* is the first of two volumes dedicated to the diverse sociocultural work of science-oriented performance. A dynamic volume of scholarly essays, interviews with scientists and artists, and creative entries, it examines explicitly public-facing science performances that operate within and for specialist and non-specialist populations. The book's chapters trace the theatrical and ethical contours of live science events, re-enact historical stagings of scientific expertise, and demonstrate the pedagogical and activist potentials in performing science in community settings. Alongside the scholarly chapters, *From the Lab to the Streets* features creative work by contemporary science integrative artists and interviews with popular science communicators. Sahana Srinivasan, host of Netflix's *Brainchild* and Raven Baxter, *Raven the Science Maven*, and artists from performance ensembles *The Olimpias* and *Superhero Clubhouse*. In exploring the science performance as a vital but flawed method of public engagement, it offers a critique of the racist, ableist, sexist, and heteronormative ideologies prevalent across the history of science, as well as highlighting science performances that challenge and redress these ideologies. Along with its complementary volume *From the Curious to the Quantum*, this book documents the varied ways in which identity categories and cultural constructs are formed and reformed through science performances.
