On Chester On Graeme J. White, 2015-05-19 Although there has been a University of Chester only since 2005 its predecessor Chester College dates back further than most UK universities to 1839 This book celebrates the 175th anniversary of the foundation in 2014 The story is a remarkable one of survival and success The early College was a pioneering venture with a unique approach to learning and the University still houses the first buildings in England specifically designed for the training of teachers Three times in the 1860s the 1930s and the 1970s Chester College came near to closure only repeatedly to emerge intact and to become stronger than before In the early twenty first century the University has a growing reputation within the higher education sector and can claim some of the highest rates of student satisfaction in the country The book's title is taken from the College motto of the late Victorian and Edwardian period as appropriate today as when it was coined

The Dangerous Rise of Therapeutic Education Kathryn Ecclestone, Dennis Hayes, 2019-02-01 The Dangerous Rise of Therapeutic Education confronts the silent ascendancy of a therapeutic ethos across the educational system and into the workplace Controversial and compelling Kathryn Ecclestone and Dennis Hayes classic text uses a wealth of examples across the education system from primary schools to university and the workplace to show how therapeutic education is turning children young people and adults into anxious and self preoccupied individuals rather than aspiring optimistic and resilient learners who want to know everything about the world Remaining extremely topical the chapters illuminate the powerful effects of therapeutic education including How therapeutic learning is taking shape now and in the future How therapeutic ideas from popular culture have come to govern social thought and policies How the fostering of dependence and compulsory participation in therapeutic activities that encourage the disclosing of emotions can undermine parents and teachers confidence and authority How therapeutic forms of teacher training undermine faith in the pursuit of knowledge How political initiatives in emotional literacy emotional wellbeing and positive mental health propagate a diminished view of human potential throughout the education system and the workplace The Dangerous Rise of Therapeutic Education is an eye opening read for every teacher and leader across the field of education and every parent and student who is passionate about the power of knowledge to transform people's lives It is a call for a debate about the growing impact of therapeutic education and what it means for learning now and in the future HLM50+

Towards a Social Architecture Tony Monk, 2017-07-06 Since its sudden and dramatic formation upon winning the competition to design Paisley Civic Centre in 1963 Hutchison Locke and Monk HLM Architects has consistently served and adapted to the changing requirements of Britain's welfare state and has instinctively dedicated its professional services to community architecture. Conceived from the perspective of founding partner Tony Monk, this book reveals the inside story of how the partnership has grown over 50 years to become a leading UK national practice. It sets out the early influences and progressive design philosophy of HLM Architects and analyses how they developed their design ethos from late modern through contextual post-modern architectural styles by the early 1980s and then matured into producing its own contemporary designs, explaining why these changes took place over that period. As well as reflecting the transformations in the social and political landscapes and in aesthetic approaches, it also inevitably records the changing social history of the architectural profession from labour-intensive manual presentations using drafting pens and drawing boards through to the slick mass-produced computer modelling that accompanied the digital revolution and the fundamental adjustments needed to meet the realities of managing an efficient modern commercial business. Working with the HLM Board, the authoritative contributors are Directors who have used their knowledge and experience in responding to government legislation with innovative architectural solutions in their specialist fields: HLM Chairman Christopher Liddle is a leading exponent of defence and custodial procurement alongside Caroline Buckingham in education and Leslie Welch in healthcare. Their award-winning projects now help formulate current policy. The critical Introduction by Dr Edward Denison re-examines the practice's philosophy and contribution to the evolving welfare state during the second half of the twentieth century. The conclusion is a perceptive assessment of the future direction of the architectural profession and a statement of HLM's continuing commitment to improving our society. The complex relationships described shed new light on previous architectural theories and in doing so, this book adds to the knowledge of post-war British architecture.
