A Healthcare Solution Mark A. Vonderembse, David D. Dobrzykowski, 2016-10-14 The evidence is undeniable By any measure the US spends more on healthcare than any other country in the world yet its health outcomes as measure by longevity are in the bottom half among developed countries and its health related quality of life has remained constant or declined since 1998 In addition to high costs and lower than expected outcomes the healthcare delivery system is plagued by treatment delays as it can take weeks to see a specialist and many people have limited or no access to care Part of the challenge is that the healthcare delivery system is a large complex and sophisticated value creation chain Successfully changing this highly interconnected system is difficult and time

consuming because the underlying problems are hard to comprehend the root causes are many the solution is unclear and the relationships among problems causes and solution are multifaceted To address these issues the book carefully explains the underlying problems examines their root causes using information data and logic and presents a comprehensive and integrated solution that addresses these causes These three steps are the methodological backbone of this book A solution depends on understanding and applying the principles of patient centered care PCC and resource management PCC puts patients supported by their primary care physicians back in the role as decision makers and depends on patients being responsible for their health including making good life style choices After all the best way to reduce healthcare costs and increase quality of life is to improve our health and wellness and as a result need less care In addition health insurance must be rethought and redesigned so it is less likely to lead to overuse For many people with health insurance the out of pocket cost of healthcare are small so healthcare decision making is often biased toward consumption Effective resource management means that healthcare providers must do a better job of acquiring and using resources in order to provide care quickly productively and correctly This means improving healthcare strategy and management accelerating the use of information technology making drug costs affordable and fair reducing the incidence of malpractice and rebuilding the provider network In addition implementation is difficult because there are many participants in the healthcare delivery value chain such as physicians nurses and medical technicians as well as many provider organizations such as hospitals clinics physician offices and labs Further up the value chain there are pharmaceutical companies equipment providers and other suppliers These participants have diverse and sometimes conflicting goals but each must be willing to accept change and work in a coordinated manner to improve healthcare To overcome these problems strong national leadership is needed to get the attention and support from the people and organizations involved in healthcare and to make the comprehensive changes that will lower healthcare costs improve healthcare quality eliminate delays increase access and enhance patient satisfaction

Crisis in Higher Education Mark A. Vonderembse, 2017-10-24 While many students parents educators and organizations who hire their graduates hold US universities in high regard the cost of higher education has risen much faster than the rate of inflation High costs in turn have severely limited access to higher education for large portions of the US population or caused graduates and those who fall short of graduation to face substantial student loan debt This book examines the root causes of these underlying problems and offers a comprehensive easy to understand high impact solution The book identifies actions that improve higher education outcomes including lower tuition costs better access for student from low and middle income homes faster throughput fewer dropouts and better job opportunities for graduates It links a real and implementable solution to the underlying problems and their root causes Upon finishing this book readers should understand why the performance of higher education needs to improve and have solid ideas about how to fix it The book focuses on public universities but the ideas discussed are also applicable to private for profit and not for profit universities

The writing style is simple and direct Directing the ERP Implementation Michael W. Pelphrey, 2015-04-02 Although many books outline approaches for successful ERP implementations the data shows that most ERP efforts yield minimal return on investment ROI with most projects failing *Directing the ERP Implementation A Best Practice Guide to Avoiding Program Failure Traps While Tuning System Performance* supplies best practices along with a proven road *Transdisciplinary Engineering Methods for Social Innovation of Industry 4.0* M. Intelligent Data Analytics for Bioinformatics and Biomedical Systems Neha Sharma, Korhan Cengiz, Prasenjit Chatterjee, 2024-10-11 The book analyzes the combination of intelligent data analytics with the intricacies of biological data that has become a crucial factor for innovation and growth in the fast changing field of bioinformatics and biomedical systems. Intelligent Data Analytics for Bioinformatics and Biomedical Systems delves into the transformative nature of data analytics for bioinformatics and biomedical research. It offers a thorough examination of advanced techniques, methodologies, and applications that utilize intelligence to improve results in the healthcare sector. With the exponential growth of data in these domains, the book explores how computational intelligence and advanced analytic techniques can be harnessed to extract insights, drive informed decisions, and unlock hidden patterns from vast datasets. From genomic analysis to disease diagnostics and personalized medicine, the book aims to showcase intelligent approaches that enable researchers, clinicians, and data scientists to unravel complex biological processes and make significant strides in understanding human health and diseases. This book is divided into three sections, each focusing on computational intelligence and data sets in biomedical systems. The first section discusses the fundamental concepts of computational intelligence and big data in the context of bioinformatics. This section emphasizes data mining, pattern recognition, and knowledge discovery for bioinformatics applications. The second part talks about computational intelligence and big data in biomedical systems. Based on how these advanced techniques are utilized in the system, this section discusses how personalized medicine and precision healthcare enable treatment based on individual data and genetic profiles. The last section investigates the challenges and future directions of computational intelligence and big data in bioinformatics and biomedical systems. This section concludes with discussions on the potential impact of computational intelligence on addressing global healthcare challenges. Audience: Intelligent Data Analytics for Bioinformatics and Biomedical Systems is primarily targeted to professionals and researchers in bioinformatics, genetics, molecular biology, biomedical engineering, and healthcare. The book will also suit academicians, students, and professionals working in pharmaceuticals and interpreting biomedical data.

Strukturierte Verbesserung des Supply Chain Risikomanagements Meike Schröder, 2019-05-31 Meike Schröder entwickelte eine Methode zur strukturierten Verbesserung des Supply Chain Risikomanagements (SCRM), welche sich aus den beiden modularen Bausteinen des SCRM Reifegradmodells und der SCRM Auditierung zusammensetzt. Durch die Anwendung des Reifegradmodells kann der aktuelle Status quo des SCRM im Unternehmen erhoben werden. Gleichzeitig beinhaltet das Modell 135 aus der Theorie und Praxis abgeleitete Maßnahmen, die vom Unternehmen ergriffen werden können, um eine nächste Reifegradstufe zu erreichen. Zusätzlich kann mit Hilfe des Auditierungskonzepts die Umsetzung eines SCRM besser nachverfolgt werden. Die entwickelten Inhalte der Methode wurden mithilfe von Fallstudien und Fokusgruppensitzungen validiert.
