World Edward Shepherd Creasy, 1987 Undoubtedly the most famous work of military history of the nineteenth century Edward S Creasy's Fifteen decisive battles of the world has been read and re read for close to 150 years It is not only the

authoritative account of each battle that makes Creasy's work such a classic it is his command of narrative his interest in human struggle his profound deductions as to effects of the battles and his striving after truth Furthermore his selections seem as wise and well considered today as when *Fifteen decisive battles* first appeared in 1851 Nobody since has made better ones nor given us better accounts Apart from the scholarship and literary skill of Creasy's book there is another reason it has endured Creasy was essentially fair minded He had been a judge and when he became England's great military critic and historian he maintained a thoroughly judicial attitude He was not a British partisan nor French nor German he was a cosmopolitan observer of great events Out of 2300 years Creasy only found fifteen battles which he called decisive in the highest sense He chose them not for the number of killed and wounded nor for their status in myth and lore but because they fundamentally changed the course of world history In doing so he made his book a miniature military history of the western world a classic that will repay continued study for generations to come as it has for generations
