

Saskatchewan Early Childhood Educator Certification Guide

Early Childhood Educators play an important role in creating and implementing quality early learning and child care programs. Saskatchewan requires educators working in child care centres to hold an Early Childhood Educator (ECE) certification from the Ministry of Education. ECE certification demonstrates that educators have the skills and knowledge to work with young children in a regulated child care facility in Saskatchewan.

Saskatchewan has three levels of ECE certification:

- Early Childhood Educator I
- Early Childhood Educator II
- Early Childhood Educator III

How to Achieve an Early Childhood Educator Certification

In Saskatchewan, there are two ways to achieve ECE certification.

The first way is to complete introductory training, a certificate, or a diploma in early childhood education from a recognized post-secondary institution.

The second way is to complete an equivalent amount of course credit units. ECE certification that is based on equivalent education is for individuals, who at the time of application for ECE certification, have completed courses relevant to early childhood education, but who have not completed an ECE credential.

Equivalent courses are typically completed in a program with a human services or education focus, such as a Bachelor of Education (with early childhood courses), an educational assistant program, or a youth care worker program.

For education equivalent to a credential in early childhood education, the Ministry of Education assesses each course completed for best fit with a subject area relevant to early childhood education. These subject areas are Child Development, Programming, Relationships and Related.

- **Child Development** means knowledge of the holistic domains of development, including the intellectual, social-emotional, physical and spiritual. The child development subject area involves understanding the interdependence of these domains, and the milestones that mark developmental progress. This subject area also describes how an educator can become attuned to a child's development through observation and authentic assessment.

Early Childhood Educators (ECEs) are essential in creating and implementing quality early learning and child care programs. Ministry of Education ECE Certification is a demonstration that an educator has the knowledge and skill to provide developmentally appropriate programs for young children.
