Leergaard, [Continental Connections](#) Hugo Anderson-Whymark, Duncan Garrow, Fraser Sturt, 2015-02-26 The prehistories of Britain and Ireland are inescapably entwined with continental European narratives The central aim here is to explore cross channel relationships throughout later prehistory investigating the archaeological links material social cultural between the areas we now call Britain and Ireland and continental Europe from the Mesolithic through to the end of the Iron Age Since the separation from the European mainland of Ireland c 16 000 BC and Britain c 6000 BC their island nature has been seen as central to many aspects of life within them helping to define their senses of identity and forming a crucial part of their neighbourly relationship with continental Europe and with each other However it is important to remember that the surrounding seaways have often served to connect as well as to separate these islands from the continent In approaching the subject of continental

connections in the long term and by bringing a variety of different archaeological perspectives associated with different periods to bear on it this volume provides a new a new synthesis of the ebbs and flows of the cross channel relationship over the course of 15 000 years of later prehistory enabling fresh understandings and new insights to emerge about the intimately linked trajectories of change in both regions

Transregional Connections in the History of East-Central Europe Katja Castryck-Naumann, 2021-10-25 Transregional connections play a fundamental role in the history of East Central Europe This volume explores this connectivity by showing how people from eastern and central parts of Europe have positioned themselves within global processes while in turn also shaping them The contributions examine different fields of action such as economy arts international regulations and law development aid and migration focusing on the period between the middle of the nineteenth century and the end of the Cold War The authors uncover spaces of interaction and emphasize that internal and external entanglements have established East Central Europe as a distinct region Understanding the connectedness of this subregion is stimulating for the historiography of East Central Europe as it is for the field of global history

Wittgenstein: Connections and Controversies P. M. S Hacker, 2001-11-22 Wittgenstein Connections and Controversies consists of thirteen thematically linked essays on different aspects of the philosophy of Wittgenstein by one of the leading commentators on his work After an opening overview of Wittgenstein s

philosophy the following essays fall into two classes those that investigate connections between the philosophy of Wittgenstein and other philosophers and philosophical trends and those which enter into some of the controversies that over the last two decades have raged over the interpretation of one aspect or another of Wittgenstein's writings The connections that are explored include the relationship between Wittgenstein's philosophy and the humanistic and hermeneutic traditions in European philosophy Wittgenstein's response to Frazer's Golden Bough and the interpretation of ritual actions his attitude towards and criticisms of Frege both in the Tractatus and in the later philosophy the relationship between his ideas and those of members of the Vienna Circle on the matter of ostensive definition and a comparison of Carnap's conception of the elimination of metaphysics and of Strawson's rehabilitation of metaphysics with Wittgenstein's later criticisms of metaphysics The controversies into which Hacker enters include the Diamond Conant interpretation of the Tractatus which is shown to be inconsistent with the text of the Tractatus and with Wittgenstein's explanations of and comments on his book Winch's interpretation of the Tractatus conception of names Kripke's interpretation of Wittgenstein's discussion of following a rule which is demonstrated to be remote from Wittgenstein's intentions and Malcolm's defence of the idea that Wittgenstein claimed that mastery of a language logically requires that the language be shared with other speakers These far ranging essays several of them previously unpublished or difficult to find shed much light upon different aspects of Wittgenstein's thought and upon the controversies which it has stimulated

Sensory Processes at the Neuronal and Behavioral Levels

G. V. Gersuni, 2013-09-11 *Sensory Processes at the Neuronal and Behavioral Levels* is a collection of papers dealing with problems of functional organization of the visual and auditory systems One paper points out that neurophysiological and psychophysiological research in vision can be combined The paper compares the cat's contrast stimulation by Hermann's grid that elicits neuronal responses of cells with concentric and simple fields as being similar to the subjective vision in man Another paper addresses the sources of information in the perception of visual spatial relations For example eye movements as the source of information about visual spatial relations are refuted The visual system already estimates accurately the spatial properties of an object before the onset of eye movements Another paper discusses certain concepts about the mechanisms of the auditory system One paper presents the results of an experiment involving some adult cats They were lightly anesthetized and their responses were recorded when the inferior colliculus or the left and right auditory cortex were stimulated electrically Another paper analyzes the mechanism used by insect in recognizing species specific songs This book is suitable for neurophysiologists neurochemists and researchers dealing with physiological acoustics and the psychophysics of the visual system

The Pragmatics of Perception and Cognition in MT Jeremiah 1:1-6:30 Elizabeth Hayes, 2008-12-10 Recent advances in cognitive linguistics provide new avenues for reading and interpreting Biblical Hebrew prophetic text This volume utilises a multi layered cognitive linguistics approach to explore Jeremiah 1 1 6 30 incorporating insights from cognitive grammar cognitive science and conceptual blending theory While the modern reader is separated from the

originators of these texts by time space and culture this analysis rests on the theory that both the originators and the modern reader share common features of embodied experience This opens the way for utilising cognitive models conceptual metaphor and mental spaces theory when reading and interpreting ancient texts This volume provides an introduction to cognitive theory and method Initially short examples from Jeremiah 1 1 6 30 are used to introduce the theory and method This is followed by a detailed comparison of traditional and cognitive approaches to Biblical Hebrew grammar These insights are then applied to further examples taken from Jeremiah 1 1 6 30 in order to test and refine the approach These findings show that Jeremiah 1 1 1 3 establishes perspective for the text as a whole and that subsequent shifts in perspective may be tracked using aspects of mental spaces theory Much of the textual content yields to concepts derived from conceptual metaphor studies and from conceptual blending theory which are introduced and explained using examples taken from Jeremiah 1 1 6 30 The entire analysis demonstrates some of the strengths and weaknesses of using recent cognitive theories and methods for analysing and interpreting ancient texts While such theories and methods do not obviate the need for traditional interpretive methods they do provide a more nuanced understanding of the ancient text

Immigrant Entrepreneurship in Cities Cathy Yang Liu, 2020-08-01 This book draws on evidence from global cities around the world and explores various dimensions of immigrant entrepreneurship and urban development It provides a substantive contribution to the existing literature in several ways First of all it pursues a comparative approach with case studies from both the global north and global south so as to broaden the theoretical framework in this area especially as pertinent to emerging economies Second it covers multiple scales from local community place making to urban contexts of reception to transnational networks and connections Third it combines approaches and research methods from numerous disciplines investigating entry dynamics trends and patterns business performance challenges and the impact of immigrant entrepreneurship in urban areas Finally it pays particular attention to current international experiences regarding urban policies on immigrant entrepreneurship Given its scope the book will be an enlightening read for anyone interested in immigration entrepreneurship and urban development issues around the globe As global cities around the world continue to attract both domestic migrants and international migrants to their bustling metropolises immigrant entrepreneurship is emerging as an important urban phenomenon that calls for careful examination From Chinatown in New York to Silicon Valley in San Francisco to Little Africa in Guangzhou immigrant owned businesses are not only changing the business landscape in their host communities but also transforming the spatial economic social and cultural dynamics of cities and regions

Components and Connections Maarten Meijs, Ulrich Knaack, 2012-11-05 Every building is composed of parts or components that may be organized in various ways For example there are different ways to configure walls so that they perform their primary functions bearing dividing and sheltering in an

optimal manner This book presents the most common load bearing systems such as plate massive and skeleton construction and describes their impact on the structure as a whole It explains how spaces can be vertically or horizontally connected and assembled into larger wholes The individual elements such as floor slabs roofs openings and foundations are described together with their functions and the various possibilities for connecting them The book goes beyond the wealth of possible detail to demonstrate the basic principles of detailing Numerous specially prepared drawings set forth the principles of components and then illustrate them with reference to realized projects

Transport Justice Karel Martens,2016-07-01
Transport Justice develops a new paradigm for transportation planning based on principles of justice Author Karel Martens starts from the observation that for the last fifty years the focus of transportation planning and policy has been on the performance of the transport system and ways to improve it without much attention being paid to the persons actually using or failing to use that transport system There are far reaching consequences of this approach with some enjoying the fruits of the improvements in the transport system while others have experienced a substantial deterioration in their situation The growing body of academic evidence on the resulting disparities in mobility and accessibility have been paralleled by increasingly vocal calls for policy changes to address the inequities that have developed over time Drawing on philosophies of social justice Transport Justice argues that governments have the fundamental duty of providing virtually every person with adequate transportation and thus of mitigating the social disparities that have been created over the past decades Critical reading for transport planners and students of transportation planning this book develops a new approach to transportation planning that takes people as its starting point and justice as its end

The Influence of Data Quality on the Detectability of Sea-level Height Variations K. I. van Onselen,2000 For low lying areas like the Netherlands an ever increasing sea level can become a serious threat This is especially true if sea level rise accelerates e g due to greenhouse gas induced warming To anticipate potential troubles it is important to have a good estimate of the expected behaviour of future sea levels This requires an accurate description of the present day sea level variation curve and of foreseeable changes in this natural pattern in the near future

Glaciers and Climate Change J. Oerlemans,2001-01-01 This text brings together meteorology and the theory of glacier flow providing a fundamental understanding of how glaciers respond to climate change Attention is paid to the microclimate of glaciers and the physical processes regulating the exchange of energy and mass between glacier surface and atmosphere Simple analytical and numerical models are used to investigate glaciers sensitivity to climate change estimate response times make an interpretation of historical glacier records assess the contribution of glacier melt to sea level rise Modern developments in glacier research including satellite measurements are discussed in detail making this a valuable reference source
