Usability Evaluation for In-Vehicle Systems Catherine Harvey, Neville A. Stanton, 2016-04-19 Ergonomics often seems to be involved too late in commercial project development processes to have substantive impact on design and usability. However, in the automotive industry and specifically in relation to In Vehicle Information Systems (IVIS), a lack of attention to usability can not only lead to poor customer satisfaction; it can also present problems. This book presents a process which will support the evaluation and modeling of driver interface interactions in a dual task driving context. This process consists of a framework of methods which can be used to evaluate and model the usability of In Vehicle information Systems (IVIS). The book's focus on design and evaluation of IVIS coupled with a systems approach to the concept of usability sets it apart. This method presents both an autopsy and diagnostic approach to investigating usability in IVIS.

Lemon-Aid New Cars and Trucks 2012 Phil Edmonston, 2011-01-01 Phil Edmonston Canada's automotive Dr Phil pulls no punches. He says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases and free auto maintenance programs. In this all new guide he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring and mind boggling depreciation. Many 2011-12 automobiles have chin to chest head restraints, blinding dash reflections and dash gauges that can't be seen in sunlight, not to mention painful wind tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save 2,000 by cutting freight fees and administrative charges. Diesel annual urea fill up scams can cost you 300 including an 80 handling charge for 25 worth of urea. Lemon Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi and Suzuki.

Motor Vehicles, the Environment, and the Human Condition Hans A. Baer, 2019-10-09 The world now has more than a billion motor vehicles and this number continues to increase as developing countries imitate developed societies in their adoption of the culture of automobility. This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises, the latter of which are most manifest in anthropogenic climate change to which motor vehicles constitute a major contributor. A political ecological perspective recognizes that motor vehicles perhaps more than any other machine embody the social, structural, cultural and environmental contradictions of the capitalist world system. In addition to highlighting many of the environmental, social and health environmental consequences of humanity's increasing reliance on motor vehicles, particularly private automobiles, this book argues that ultimately we need as a species to move beyond motor vehicles as much as possible, but that such an effort will have to be part

and parcel of creating an alternative world system based on social justice democratic processes environmental sustainability and a safe climate one termed democratic eco socialism **Lemon-Aid New Cars and Trucks 2013** Phil
