The Historians' History of the World Vol.1 (of 25) (Illustrations)

Henry Smith Williams, A complete world history should properly speaking begin with the creation of the world as man s habitat and should trace every step of human progress from the time when man first appeared on the globe Unfortunately the knowledge of to day does not permit us to follow this theoretical obligation We now know that the gaps in the history of human evolution as accessible to us to day vastly exceed the recorded chapters that in short the period with which history proper has at present to content itself is a mere moment in comparison with the vast reaches of time which in recognition of our ignorance we term prehistoric But this recognition of limitations of our knowledge is a quite recent growth no older indeed than a half century Prior to 1859 the people of Christendom rested secure in the supposition that the chronology of man s history was fully known from the very year of his creation One has but to turn to the first chapter of Genesis to find in the margin the date 4004 B C recorded with all confidence as the year of man s first appearance on the globe One finds there

too a brief but comprehensive account of the manner of his appearance as well as of the creation of the earth itself his abiding place Until about half a century ago as has just been said the peoples of our portion of the globe rested secure in the supposition that this record and this date were a part of our definite knowledge of man s history Therefore one finds the writers of general histories of the earlier days of the nineteenth century beginning their accounts with the creation of man B C 4004 and coming on down to date with a full and seemingly secure chronology Our knowledge of the world and of man s history has come on by leaps and bounds since then with the curious result that to day no one thinks of making any reference to the exact date of the beginnings of human history unless indeed it be to remark that it probably reaches back some hundreds of thousands of years The historian can speak of dates anterior to 4004 B C to be sure The Egyptologist is disposed to date the building of the Pyramids a full thousand years earlier than that And the Assyriologist is learning to speak of the state of civilisation in Chaldea some 6000 or 7000 years B C with a certain measure of confidence But he no longer thinks of these dates as standing anywhere near the beginning of history He knows that man in that age in the centres of progress had attained a high stage of civilisation and he feels sure that there were some thousands of centuries of earlier time during which man was slowly climbing through savagery and barbarism of which we have only the most fragmentary record He does not pretend to know anything except by inference of the dawns of civilisation Whichever way he turns in the centres of progress such as China Egypt Chaldea India he finds the earliest accessible records covering at best a period of only eight or ten thousand years giving evidence of a civilisation already far advanced Of the exact origin of any one of the civilisations with which he deals he knows absolutely nothing The Creation of Man with its fixed chronology is a chapter that has vanished from our modern histories To be continue in this ebook **Keep It Real With PBL, Secondary** Jennifer Pieratt,2019-12-19 Let s Get Real About PBL The book s companion website features an updated guide to help teachers integrate technology into PBL experiences for online and blended learning instruction Does project based learning PBL feel just out of reach in in your secondary classroom Is project planning an overwhelming project in and of itself Dr Jennifer Pieratt a consultant and former teacher knows firsthand how challenging designing projects can be especially for secondary teachers with large caseloads and short class periods to engage in meaningful teaching and learning In this hands on interactive guide Pieratt supports secondary teachers through the iterative process of planning authentic project based learning experiences Using backward design she gives teachers ready to use strategies for identifying the best concepts to tackle in PBL experiences brainstorming realistic projects facilitating meaningful learning and creating formative and summative assessments The book is visually accessible in style and features reallife soundbites that tackle the challenges to implementing PBL Tips and resources to support the project planning process Planning forms to guide you through planning your projects Key terminology and acronyms in PBL Exercises to help you reflect and process throughout your project plans Master PBL planning with this clear efficient and easy to use guide to creating enriching experiences for your students [The Guide to](#)
