has comprised a decisive factor in shaping both biowarfare strategy and political rhetoric and why the taboo needs to be recognised as a necessary consideration in the study of bioweapons In analysing a taboo the volume also takes the debate on international norms forward by questioning and challenging the wider analytic comprehension of taboo itself Rejecting current definitions of the concept as inadequate Bentley proposes a new and original model of understanding based on the normative characteristics of disgust stigmatization and fetishization University of the South Pacific, Publications ,1996
