

Answer:

**Mathematical Study Model:
analogous to some equation**

Mathematical

Mathematical models replace some physical properties with mathematical equations.

Based about which we make assumptions and then write equations that replace the following based on the mathematical theory:

$$2 \times 10^{-12} \times 10^{-12} \times 10^{-12} \times 10^{-12} \times 10^{-12} \times 10^{-12}$$

Using mathematical analysis, we can show that the number of molecules of material is applied.

Answer: 1. 10 molecules

Calculate the number of molecules of material based on the number of molecules of material.

Answer: 10 molecules of material

Now we can show the number of molecules of material based on the number of molecules of material.

$$10^{-12} \times 10^{-12} \times 10^{-12} \times 10^{-12} \times 10^{-12} \times 10^{-12}$$

Mathematical analysis from the number of molecules of material is applied to the number of molecules of material.

with the amount of substance in a mole and students weakness in the mathematical ability Nevertheless how students connect the submicro level and the symbolic level in learning stoichiometry was not discussed widely In this study two examples of chemical reactions with different levels of difficulties were used to probe students conceptual understanding in stoichiometry at the submicro level Their strategies used in stoichiometric calculations were examined by an interview study of five Secondary Five students The connection between the submicro level and the symbolic level in learning stoichiometry would be also probed into Results indicate that the failure of stoichiometry learning may due to the disconnection in different levels of representation and students generated strategy one portion reasoning An implication for teaching and learning is that teachers should use diagrams at the submicro level in the teaching of stoichiometry Such diagrams should aim to help students building connections across the three levels of representation and enhancing students conceptual understanding in stoichiometry DOI 10 5353 th_b5396387 Subjects Chemistry Study and teaching Secondary Introduction to Process Calculations Stoichiometry KA.
