**Masculinities under Neoliberalism** Andrea Cornwall, Frank G. Kariotis, Nancy Lindisfarne, 2016-05-15 Neoliberalism has had a radical impact on the lived gendered experiences of people around the world But while the gendered dimensions of neoliberalism have already received significant scholarly attention the existing literature has given little consideration to men s identities and experiences Building on the work of Cornwall and Lindisfarne s landmark text *Dislocating Masculinity* this collection provides a fresh perspective on gender dynamics under neoliberalism Bringing together a series of short readable case studies drawn from new ethnographic fieldwork its subjects range from the experiences of working class men in Putin s Russia to colonial masculinities in Southern Rhodesia and from young British Muslim men to amateur footballers in Jamaica

**Infrastructures for Peace in Sub-Saharan Africa** Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it *Introduction to Gender Studies in*

*Eastern and Southern Africa* James Etim, 2016-07-28 Africa has witnessed massive changes in the last fifty years from independence through structural adjustment rule by military juntas in several countries and to a period now where the focus is on how best to prioritize their needs based on resources national goals and human potential There is general agreement that human capital is important in economic growth and development There is always the need to ensure that resources and human capital are used appropriately to advance development Gender disparities whether in treatment access to resources resource utilization and the law may in themselves retard or slow down development Resources and human potential in all societies include how best to ensure there is no gender disparity and to fully tap the resources inherent in women for personal social and national development Beginning with the women s suffrage movement there has been the push to encourage gender equality worldwide The Fourth World Conference on Women in Beijing in 1995 embodies the commitment

of the international community to implement policies that will enhance the political social economic educational empowerment of women This book highlights the issues affecting women in Eastern and Southern Africa what role does custom and patriarchy play in gender disparities in education access to health problems in the workplace and family relationships How have women writers in the last twenty years presented the issues of patriarchy women s rights globalism and women s holistic development What are recent developments that have helped improve the situation for some women These are some of the issues that are covered in this book The thesis of this book is that there have been policies and strategies developed that have worked to empower women However vestiges of sexism gender disparities in several fields still remain and traditions customs and patriarchy have aided in still keeping women down

div div State Capacity, Economic Control, and Authoritarian Elections Merete Seeberg, 2018-03-09 Although the phenomenon of authoritarian elections has been a focal point for the literature on authoritarian institutions for more than a decade our understanding of the effect of authoritarian elections is still limited Combining evidence from cross national studies with studies on selected cases relying on recent field work this book suggests a solution to the paradox of authoritarian elections Rather than focusing on authoritarian elections as a uniform phenomenon it focuses on the differing conditions under which authoritarian elections occur It demonstrates that the capacities available to authoritarian rulers shape the effect of elections and high levels of state capacity and control over the economy increase the probability that authoritarian multi party elections will stabilize the regime Where these capacities are limited the regime is more likely to succumb in the face of elections The findings imply that although multi party competition and state strength may be important prerequisites for democracy they can under some circumstances obstruct democratization by preventing the demise of dictatorships This text will be of key interest to scholars students and practitioners of democratization and to those who study autocracy and electoral authoritarianism as well as comparative politics more broadly

**The Return of Food** Tawodzera, Godfrey, Crush, Jonathan, 2016-06-14 The nadir of Zimbabwe s political and economic crisis in 2008 coincided with the implementation of a baseline household food security survey in Harare by AFSUN This survey found that households in low income urban areas in Zimbabwe s capital were far worse off in terms of all the food insecurity and poverty indicators than households in the other 10 Southern African cities surveyed by AFSUN The central question addressed in this report is whether food security in Zimbabwe s urban centres has improved AFSUN conducted a follow up survey in 2012 that allows for direct longitudinal comparisons of continuity and change The status of household food security in low income neighbourhoods in Harare was improved in 2012 relative to 2008 and yet persistently high rates of severe food insecurity demonstrate that the daily need to access adequate food continued to be a major challenge The key lesson for policymakers is that even in the context of overall economic improvement food insecurity remains endemic among the poorest segments of the urban population Households are already accustomed to drawing on resources outside of the formal economy and improvements in employment income

have not reversed that trend These alternative livelihood strategies should therefore be considered as a normal part of urban life and supported with state resources that can improve access to food for the most marginalized groups

*Sustainable Development in Africa* Walter Leal Filho,Rudi Pretorius,Luiza Olim de Sousa,2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non formal education Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries Due to their complexity the interrelations between social economic and political factors related to sustainable development especially at universities need to be better understood There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges It is against this background that this book has been produced It is a truly interdisciplinary publication useful to scholars social movements practitioners and members of governmental agencies and private companies undertaking research and or executing projects focusing on sustainability from across Africa As African nations strive to pursue the UN Sustainable Development Goals it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on going and future efforts The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion administration environment languages and media studies

**Grid-locked African Economic Sovereignty** Warikandwa, Tapiwa Victor,Nhemachena, Artwell,2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions Disaster Risks and Hazards Rosemary Kasimba,Innocent Chirisa,2025-07-18 This book discusses disaster risks and hazards as well as measures to increase people s resilience The 21st Century has experienced a number of disasters that resulted in hampering socio economic development the loss of lives and property hence they are a threat to sustainable development Disaster risk management efforts and practices have failed to arrest the underlying drivers of increased global risk No country is immune to disaster risk thus resilience has become a critical component of disaster management It provides an opportunity to confront the social ecological foundations of disasters However it has been vaguely conceptualised and lacks a concrete approach to operationalization Some developing countries are gradually coming to realise that preparedness hazard mapping prediction risk and vulnerability assessment and planning are critical for increasing resilience and reducing losses following disasters A paradigm shift is required from reactionary to proactive measures in disaster management as the later focuses more on increasing the resilience of the community Zimbabwe s disaster management policy of 1979 is in the process of review following Cyclone Idai in March 2019 and the Corona Virus 19 COVID 19 Furthermore the consequences of climate change disaster are being felt with across the world particularly developing countries whose preparatory measures for such disasters are inadequate Disasters have become inevitable and no country is every country is vulnerable to them In the event of these disasters the vulnerable people are at risk and are affected more as majority of them are not able to cope In developed countries measures are in place to assist the vulnerable in the event that a disaster strikes However Zimbabwe being a developing country is not able to deal with unpredictable disasters due to lack of resources hence the need for it to

adopt mitigatory and transformative measures to reduce the impact of any form of disasters **Keeping the Republic** Christine Barbour, Gerald C. Wright, 2016-11-19 This refreshed and dynamic Eighth Edition of *Keeping the Republic* revitalizes the twin themes of power and citizenship by adding to the imperative for students to navigate competing political narratives about who should get what and how they should get it The exploding possibilities of the digital age make this task all the more urgent and complex Christine Barbour and Gerald Wright the authors of this bestseller continue to meet students where they are in order to give them a sophisticated understanding of American politics and teach them the skills to think critically about it The entire book has been refocused to look not just at power and citizenship but at the role that control of information and its savvy consumption play in keeping the republic **Journalism, Democracy, and Human Rights in Zimbabwe** Bruce Mutsvairo, Cleophas T. Muneri, 2019-11-29 *Journalism Democracy and Human Rights in Zimbabwe* provides an empirical analysis of Zimbabwe's ongoing state of affairs Bruce Mutsvairo and Cleophas T Muneri examine the intersection between journalism democracy and human rights to historicize and critique past successes and failures that have played out in Zimbabwe's past as well as interrogate future challenges that await the nation's quest for democratization The authors examine what role citizen journalists human rights activists professional journalists and social media dissents could potentially play toward ending the country's current adversity Scholars of journalism media studies communication African studies and political science will find this book particularly useful **Cyclones in Southern Africa** Godwell Nhamo, David Chikodzi, 2021-09-28 Tropical cyclones in Southern Africa also known as hurricanes or typhoons in other regions of the world is a hot subject for academic research This focus has been magnified by the need to consider tropical cyclones in the context of other global development agendas that includes the 2030 Agenda for Sustainable Development and its inseparable 17 Sustainable Development Goals SDGs the Paris Agreement the Sendai Framework for Disaster Risk Reduction and Habitat III's New Urban Agenda The ambitious SDGs challenge global and community leaders to make sure development addresses the nexus among poverty inequality and employment creation as well as care for the earth and its natural resources and biodiversity The SDGs further present an agenda to eradicate hunger bring quality education and sustain water and sanitation The infrastructure development human settlements sustainable consumption and production climate change biodiversity and the ocean blue economy agendas are also pitched Lastly the 2030 Agenda for Sustainable Development encourages partnerships on delivering various programmes and projects at all spatial levels However as tropical cyclones continue to make multiple landfalls and ravage Southern Africa and other parts of the world the achievement of the 2030 Agenda for Sustainable Development is threatened To this end this book addresses this gap by documenting the implications of tropical cyclones drawing examples and case studies from recent tropical cyclones such as cyclone Idai and cyclone Kenneth that resulted in catastrophic impacts in 2019 The book comes as part of a series with three volumes The other volumes include *Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai*

*Tourism, Change and the Global South* Jarkko Saarinen, Jayne M.

Rogerson, 2021-06-16 This significant volume is the first to focus on both the changing nature of tourism and the capacity of tourism to effect change, especially in the Global South. Geographically, this changing nature of tourism is based on the transforming relationships between demand, supply, and location. While this is nothing new in tourism, recent decades have intensified the changing characteristics of global tourism. From another perspective, tourism represents a change, and nowadays many localities and regions aim to use tourism as a tool for positive change, i.e., development. However, this has turned out to be a challenging task in practice, especially in the Global South context where the relationship between tourism growth and local development has often been controversial. This book looks at a host of critical concepts in one volume, such as growth and development, adaptation and resilience, sustainability and responsibility, governance and planning, and heritage and destination management strategies. By understanding the drivers of change, this book sheds new insight into the promise and role of sustainability and responsibility in tourism development. This book will be of great interest to all upper level students, academics, and researchers in the fields of Tourism, Geography, and Cultural and Heritage studies.
