## **Zimsec Human And Social Biology:**

*Sociology A-Level (ZIMSEC) Past Exam Questions and Model Answers* David Chitate ,2024-06-06 This book contains the most comprehensive question bank and model answers for ZIMSEC A Level exam questions It also includes syllabus review notes and exercises Examiners provide observations and tips and point out common errors that students make when answering questions If you use this book faithfully you can t fail and the Grade A is very much within your reach     *Some Developments in Research in Science and Mathematics in Sub-Saharan Africa* Lorna Holtman,2008 Much attention in late developing countries is given to providing access to studies which allow school leavers to enter science and technology related careers These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries But is providing access to institutions enough Students in developing countries often come from school environments lacking in resources human physical and financial This book in a number of chapters reviews research related to the crucial dimension of epistemological access to the disciplines of import which students need as much as institutional access in order to improve their chances of success A significant feature of this collection s research studies is that their empirical bases are highly localised covering areas such as research methods access curriculum instruction and assessment and the relevance of science and mathematics education in Zimbabwe Uganda Swaziland South Africa Namibia Malawi Ghana and Lesotho This volume provides invaluable insights and will be of relevance to researchers policy makers and lecturers interested in these research outcomes in Sub Saharan Africa It is the outcome of a doctoral research capacity development project the Graduate Studies in Science Mathematics and Technology Education GRASSMATE     *ZIMSEC Game Changer: Guaranteed Pass for 'O' and 'A' Levels"* David Chitate,2024-06-06 Unlock your full potential with our unparalleled series of exam coaching books for O and A Level Examinations Combining cutting edge technology and expert insights this book offers an unrivalled preparation tool to ensure your success Dive into this resource and experience a glimpse of the exceptional quality found throughout our Past Exam Question Bank series Take advantage of this opportunity and elevate your exam readiness to new heights     *Human Evolutionary Biology* Michael P. Muehlenbein,2010-07-29 Wide ranging and inclusive this text provides an invaluable review of an expansive selection of topics in human evolution variation and adaptability for professionals and students in biological anthropology evolutionary biology medical sciences and psychology The chapters are organized around four broad themes with sections devoted to phenotypic and genetic variation within and between human populations reproductive physiology and behavior growth and development and human health from evolutionary and ecological perspectives An introductory section provides readers with the historical theoretical and methodological foundations needed to understand the more complex ideas presented later Two hundred discussion questions provide starting points for class debate and assignments to test student understanding     *Afrotropical Streams and Rivers* Tatenda Dalu, Frank Masese,2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and

Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic processes Contains unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent **G.K. Hall**

**Interdisciplinary Bibliographic Guide to Black Studies** Schomburg Center for Research in Black Culture,2003

**Access of Girls and Women to Scientific, Technical and Vocational Education in Africa** Augustin Mariro,1999

**Spatial Resilience in Social-Ecological Systems** Graeme S. Cumming,2011-02-09 Spatial Resilience is a new and exciting area of interdisciplinary research It focuses on the influence of spatial variation including such things as spatial location context connectivity and dispersal on the resilience of complex systems and on the roles that resilience and self organization play in generating spatial variation Prof Cumming provides a readable introduction and a first comprehensive synthesis covering the core concepts and applications of spatial resilience to the study of social ecological systems The book follows a trajectory from concepts through models methods and case study analysis before revisiting the central problems in the further conceptual development of the field In the process the author ranges from the movements of lions in northern Zimbabwe to the urban jungles of Europe and from the collapse of past societies to the social impacts of modern conflict The many case studies and examples discussed in the book show how the concept of spatial resilience can generate valuable insights into the spatial dynamics of social ecological systems and contribute to solving some of the most pressing problems of our time Although it has been written primarily for students this book will provide fascinating reading for interdisciplinary scientists at all career stages as well as for the interested public Graeme Cumming central in the development of resilience thinking and theory has produced a wonderful book on spatial resilience the first ever on this topic The book will become a shining star a classic in the explosion of new ideas and approaches to studying and understanding social ecological systems Carl Folke Stockholm Resilience Centre Sweden *Land Change Science* Garik Gutman,Anthony C. Janetos,Christopher O.

Justice,Emilio F. Moran,John F. Mustard,Ronald R. Rindfuss,David Skole,Billy Lee Turner II,Mark A. Cochrane,2012-03-24 This volume is a synthesis of the NASA funded work under the Land Cover and Land Use Change Program Hundreds of scientists have worked for the past eight years to understand one of the most important forces that is changing our planet human impacts on land cover that is land use Its contributions span the natural and the social sciences and apply state of the art techniques for understanding the earth satellite remote sensing geographic information systems modeling and advanced

computing It brings together detailed case studies regional analyses and globally scaled mapping efforts This is the most organized effort made to understand the dominant force that has been responsible for changing the Earth s biosphere Audience This publication will be of interest to students scientists and policy makers This volume includes a CD ROM containing full color images of a selection of illustrations which are printed in black and white in the book The Sustainability Ethic in the Management of the Physical, Infrastructural and Natural Resources of Zimbabwe Chirisa, Innocent, 2019-05-27 Humanity has extensively exploited natural and physical resources since the Industrial Revolution in Europe A geological era now called the Anthropocene has been coined in environmental and developmental circles to mark the increased domination of humanity on Earth and its resources Today the ecological footprint on the fragile planet continues to increase Mass industrialisation like what China is doing and pushing for is one of the drivers for increased urbanisation that results in increased demand for land It is also the stimulus behind increased deforestation overfishing and pollution As the fragility of the Earth increases global bodies like the Intergovernmental Panel on Climate Change are pushing to reduce the Earth s temperature Human efforts to manage the problem cascade from a global to a regional to a national as well as to much localised scales Missing though are nuanced contributions at national and community levels which this book is an attempt to bridge The nagging sense of responsibility is what this book explores under the label of sustainability ethic As a case study the book examines the use of sustainability ethic in the management of the physical infrastructural and natural resources of Zimbabwe This ethic is built on pillars that include participation of people households in their pursuit for sustainable livelihoods appropriate technology tools and techniques for environmental protection It also hinges on stewardship and structures institutions policies and processes of governance and sustainability There are also the aspects of ethics laws and indigenous technical knowledge for sustainability capacity building and education plans and programmes for sustainability and population and demographic determinants processes and outcomes for sustainability The book is a timely contribution to an urgent global concern and climate change debate

**Human-Animal Relations in Tourism, Leisure and Development** Carlos Monterrubio, Xavier

López-Medellín, Katherine Dashper, Helen Wadham, 2025-04-17 Humans and animals have developed multiple and complex interactions in the fields of tourism leisure and development However much of the existing research on how humans and animals interact in these fields has emerged from within the context of developed countries As a result little has been documented about human animal interactions in the socioeconomic cultural and environmental contexts of countries in the Global South Specifically the diversity and complexity of interspecies relationships in tourism leisure and local development in Latin America have been largely ignored in Anglo Saxon literature This has resulted in a limited partial and hegemonic understanding and debate about human animal relationships globally dominated by certain regions of the world This book addresses this gap by documenting multiple and complex relationships between humans and animals in the fields of tourism

leisure and local development in countries in Latin America      *Cyclones in Southern Africa* Godwell Nhamo, Kaitano Dube, 2021-07-24 The subject of tropical cyclones in Southern Africa also known as hurricanes or typhoons in other regions of the world has been growing over the past few decades However there is still limited literature on foundational and fundamental topics on the matter To this end this book addresses this gap citing some examples from both historic and recent tropical cyclones The book presents meteorological and climatic aspects of tropical cyclones including reviews on forecasting warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth Fundamentals in disaster risk reduction DRR are also discussed moving from the provisions of the Hyogo Framework for Action 2005 2015 to the Sendai Framework for Disaster Risk Reduction 2015 2030 Climate change issues are central to the publication as well as the role of information and communication technologies in DRR and management The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR The book comes as part of a series with three volumes The other volumes include *Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe* and *Cyclones in Southern Africa Vol 3 Implications for the Sustainable Development Goals* To this end this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health      **Outpost**, 2006      *Chronic Conditions, Fluid States* Lenore Manderson, Carolyn Smith-Morris, 2010-05-13 *Chronic Conditions Fluid States* explores the uneven impact of chronic illness and disability on individuals families and communities in diverse local and global settings To date much of the social as well as biomedical research has treated the experience of illness and the challenges of disease control and management as segmented and episodic Breaking new ground in medical anthropology by challenging the chronic acute divide in illness and disease the editors along with a group of rising scholars and some of the most influential minds in the field address the concept of chronicity an idea used to explain individual and local life worlds question public health discourse and consider the relationship between health and the globalizing forces that shape it

Bibliographic Guide to Black Studies Schomburg Center for Research in Black Culture, 1997      **Sacred Natural Sites** Bas Verschuuren, Robert Wild, Jeffrey Mcneely, Gonzalo Oviedo, 2012-06-25 *Sacred Natural Sites* are the world's oldest protected places This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats India Sagarmatha Chomolongma Mt Everest Nepal Tibet and China the Golden Mountains of Altai Russia Holy Island of Lindisfarne UK and the sacred lakes of the Niger Delta Nigeria The book illustrates that sacred natural sites although often under threat exist within and outside formally recognised protected areas heritage sites Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes They also form important nodes for maintaining a dynamic socio cultural fabric in the face of global change The diverse authors bridge the gap

between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio economic interests of the custodian communities and other relevant stakeholders
