It is common knowledge that development without security is like a runaway horse Yet development in Africa has been plagued by insecurities since the extractive periods of slave trade and colonialism In spite of political independence and the euphoria of sovereignty as states Africa has failed to address insecurity which continues to loom large and to threaten aspirations towards truly inclusive and sustainable development A consequence has been Africa's development naivety vis-à-vis the monopolisation of development by the predatory elite actors of the global North and their local facilitators To salvage the continent from such predation and the insecurities engendered requires novel and innovative imagination and praxis This book draws from both the haunted landscapes and bitter memories of past exploitations and from the feeding of the insatiable North with African resources and humanity It brings together essays by a concerned generation of scholars driven

by the urgent need for radical decolonisation of African development and its legacies of insecurities It is handy to students and practitioners in economics policy studies political science development studies global and African studies
