Seed system of Pakistan: Policy challenges and prospects Rana, Abdul Wajid, Gill, Sitara, Akram, Iqra, 2022-09-26 The seed industry in Pakistan has undergone significant developments since the 1950s and has transitioned from Green Revolution to Gene Revolution The 2015 amendment in the Seed Act 1976 and the enactment of Plant Breeders Rights Act and Rules have provided long awaited intellectual property protection for proprietary seed Notwithstanding this fundamental change the challenge of effective enforcement of intellectual property rights remains This paper presents how the seed industry has evolved over the years through evaluating the regulatory and

institutional framework along with looking into the major challenges that still plague the seed system of Pakistan. It also explores how the private sector can be incentivized to invest in the seed sector while protecting the farmers' rights. Findings reveal that there seems to be a lot of scope for strengthening the seed system of Pakistan via encouraging private sector participation mainly through developing proactive markets with strong institutional mechanism along with scientific and time bound regulatory approval framework. An appraisal of the international best practices divulges that technological backstopping, developing public private partnerships, building institutional capacity for effective enforcement of regulatory regime and availability of information to farmers for selecting quality seed are equally vital for creating a well functioning seed system in Pakistan.

Global Status Report on Road Safety 2015 World Health Organization, 2015-12-17 The Global status report on road safety 2015 reflecting information from 180 countries indicates that worldwide the total number of road traffic deaths has plateaued at 1.25 million per year with the highest road traffic fatality rates in low income countries. In the last three years 17 countries have aligned at least one of their laws with best practice on seat belts, drink driving, speed, motorcycle helmets or child restraints. While there has been progress towards improving road safety legislation and in making vehicles safer, the report shows that the pace of change is too slow. Urgent action is needed to achieve the ambitious target for road safety reflected in the newly adopted 2030 Agenda for Sustainable Development halving the global number of deaths and injuries from road traffic crashes by 2020. Made possible through funding from Bloomberg Philanthropies, this report is the third in the series and provides a snapshot of the road safety situation globally, highlighting the gaps and the measures needed to best drive progress.
